

# Database Structure

## Version 2.8

“When all else fails, read the manual.”

---

Consortium members: Connecticut, Iowa, Michigan, Minnesota, Montana, Nevada, North Carolina, Oregon, Virginia, Wisconsin, and the Employment and Training Administration (ETA)

## **WID Version 2.8 - Release History**

Release Date: May 15, 2019

## INTRODUCTION

The **Workforce Information Database (WID)** is a standardized database structure developed for the storage and dissemination of local, state, regional, and national workforce information on the economy, industry, labor supply and demand, and other aspects of and areas affected by, or that have an effect on our workforce. Population of the database is a core deliverable of the ETA State Workforce Information Grant and is carried out by the agency that has responsibility for collecting, preparing, and disseminating the information within each state. The WID structure is continually updated to incorporate new data and adapt to new technology in order to accommodate the wide range of uses and users of this information. Structure updates are also driven by WID users submitting requests, comments, and concerns to Analyst Resource Center (ARC) consortium members or by the ARC directly (see Contact Information below). The change process is coordinated by the Analyst Resource Center Consortium ,which is funded by the U.S. Department of Labor, Employment and Training Administration (ETA). The Consortium is led by the state of Minnesota. Membership includes Connecticut, Iowa, Michigan, Minnesota, Montana, Nevada, North Carolina, Oregon, Virginia, Wisconsin, and the ETA.

## TABLE LAYOUTS

The table layouts for the Workforce Information Database tables are presented in this document. They are organized into four types: lookup tables, data tables, crosswalks, and administrative or application developers' tables. There is also a section of standard field values. The lookup tables contain relatively constant data that pertains mainly to descriptive data associated with classification codes. The data tables contain information about employment, wages, income, layoffs, industries, occupations, employers, education and training completers, educational programs, population demographics, selected economic indicators, and other data. These tables are intended to contain information that is maintained on a regular basis by each state. The crosswalk tables are a subset of the lookup tables representing the relationships between various classification codes. The administrative tables are tables used by the database administrator to record database management activities. This section also contains the all-codes tables used for industry codes and occupation/training codes (see below). The field values tables present standard values assigned to fields in the respective tables that are to be used in populating the database.

## CORE TABLES

Core Tables are a group of data tables, and related lookup tables, that contain the most common data produced by state departments of labor, and are thus considered mandatory according to the WIG TEGL controlling the ARC. As described at the WIDCenter website: As stated in the Employment and Training Administration (ETA), Workforce Information Core Products and Services Grant, “States are required to implement and maintain the most current version of the Workforce Information Database and populate all tables designated as core tables in accordance with guidelines issued by the Analyst Resource Center (ARC). Database content must be updated timely in order to be as current as the state’s most recent publications and data releases.” **The core tables are listed in Appendix E, as well as indicated with an apple core:**

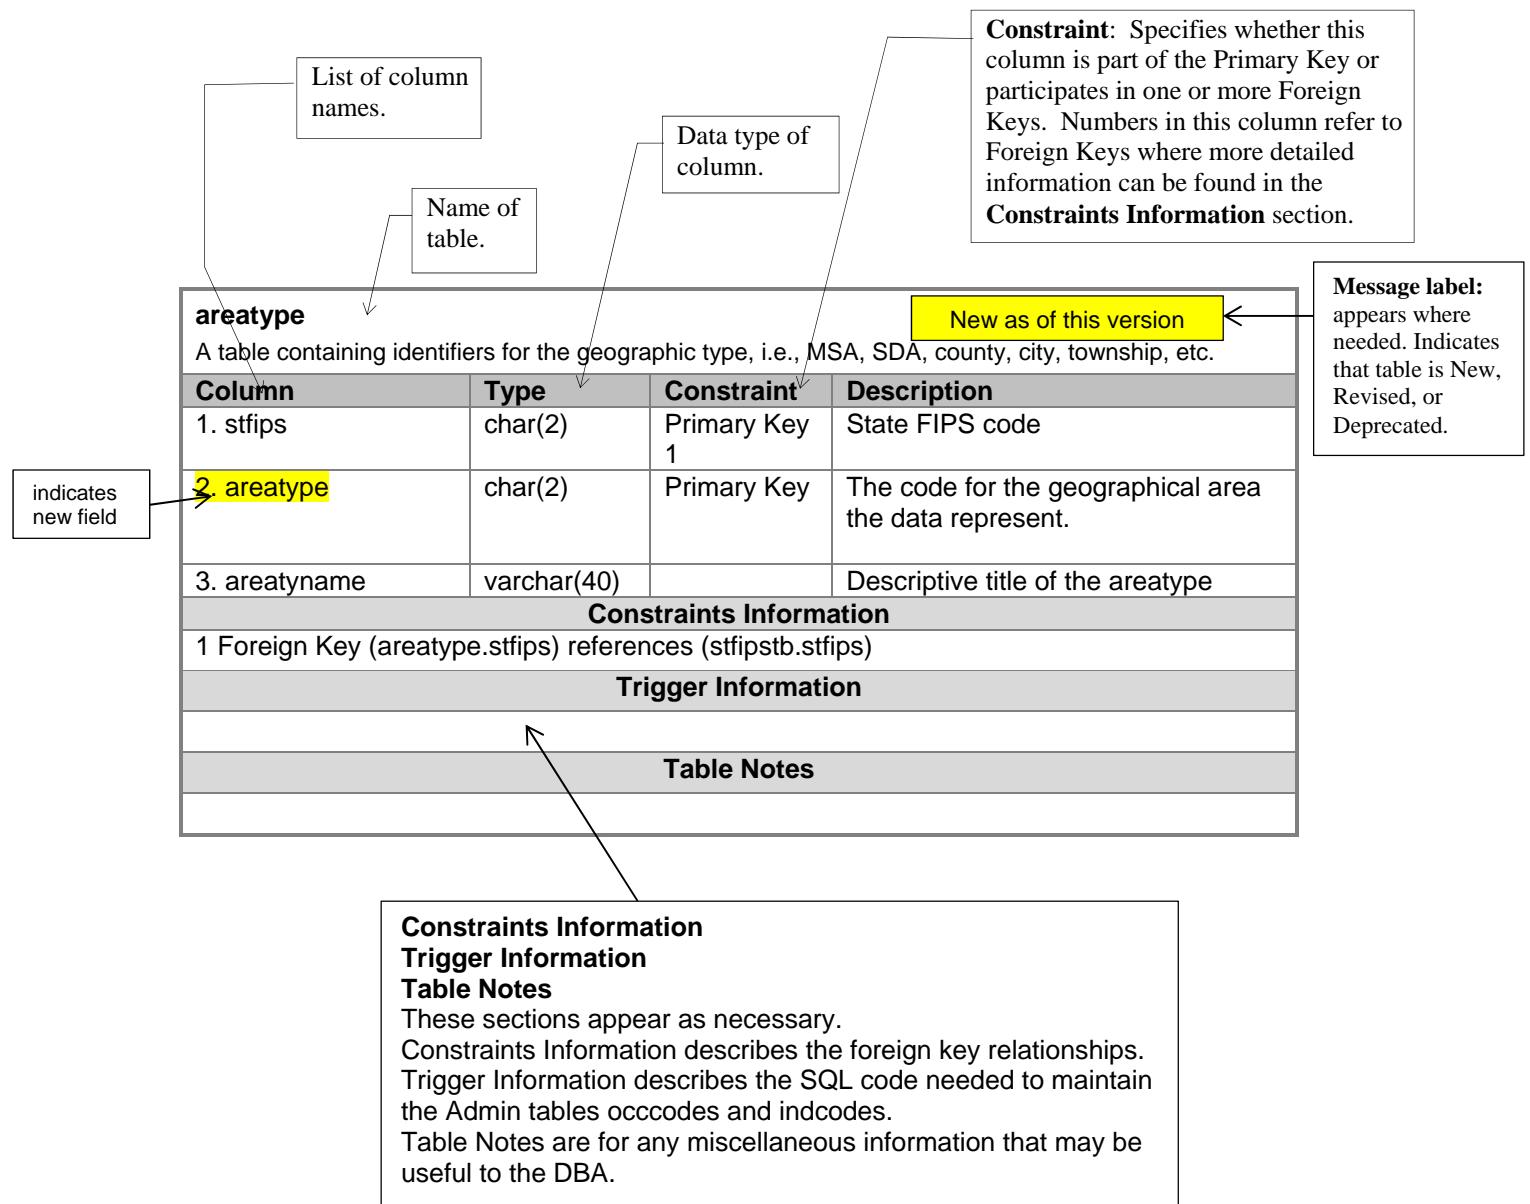

## CHANGES MADE FROM PRIOR VERSIONS

**Appendix D** lists the changes made to the Workforce Information Database from the prior version to this current one.

## HOW TO READ A TABLE DEFINITION

Each table definition contains complete information about the structure of a table. Each definition includes: the name of the table, a complete list of each column name and data type, complete constraint information, and short descriptions of the columns. The following illustration identifies each component of a table definition.

## HOW TO USE THE STANDARD FIELD VALUES

Those fields with standard values, such as area types and industry and occupation code types, are arranged in alphabetical order under the Standard Field Values section. For example, if you are

loading or using county data, you can look in the Field Values under "areatype" to see that County is area type = 04.

areatype
<b>Values:</b>
00 US
01 State
02 MSA
03 SDA
<b>04 County</b>
05 Minor Civil Division
06 BLS Region
07 Broad Geographic Area (BGA)
08 Economic Development Region
09 Planning Region
10 Labor Market Area
11 City
12 Town
13 Township
14 Municipality/Suburb
15 Workforce Investment Region
16 One Stop Area
17 Workforce Development Area
18 Job Center Area
19 Congressional District
20 Census Places
21 Metropolitan Statistical Area *
22 Micropolitan Statistical Area *
23 Metropolitan Division *
24 Combined Statistical Area*
25 Metropolitan New England City and Town Area (NECTA) 2010
26 Micropolitan New England City and Town Area (NECTA) 2010
27 New England City and Town Area (NECTA) Divisions 2010
28 Combined New England City and Town Area (NECTA) 2010
30 Balance of State
31 Metropolitan Statistical Area 2010
32 Micropolitan Statistical Area 2010
33 Metropolitan Division 2010
34 Combined Statistical Area 2010
35 EEO County Group
40 BLS CPI areas
41 BLS CPI areas 2018
50-70 State-Defined Area

The other commonly used standard field is *codetype*, which denotes the coding system used for industries, occupations, and education programs. This is the field used by the administrative tables *indcodes* and *occcodes* to reference the code system. Although the table contains 20 values, most industry data will be NAICS-based, *codetype* = 10, and most occupation data will be SOC-based, either 2010 (*codetype*=14), or the newer 2018 (*codetype*=19).

Other fields with standard values include various look-up tables, such as *annslrng* (annual sales range), *cescode* (industry codes specific to CES), and *popsource* (sources for population data).

For all of these, having standardized values means that we are all talking about the same thing when we look at data.

## TABLE CONSTRAINTS AND TRIGGERS

The Constraint section of each table definition identifies all Primary Keys and Foreign Keys for the table. The constraints for a table specify rules for data that will be stored in that table. These rules exist in the form of either Primary Keys or Foreign Keys. The definitions of these terms appear below:

**Primary Key:** The *Primary Key* is a column or group of columns that shall always be (1) non-null and (2) unique. Only one primary key exists for each table. A Primary Key constraint is enforced on a table so that each row in the table can be uniquely identified.

**Foreign Key:** A *Foreign Key* is a column or group of columns where each value or group of values exists as a Primary Key in another table. Foreign Key constraints are used so that data for a column or group of columns can be validated against another table containing a list of valid values for that column or group of columns.

Throughout the table definitions, Primary Keys and Foreign Keys are used wherever possible to achieve the greatest level of data quality. For example, in the table *ces*, there is a column called *seriescode*. By specifying a Foreign Key constraint on the *seriescode* column referencing the table *cescode*, no row in the *ces* table will ever contain a value for *seriescode* that does not already exist in the table *cescode*. This protects the *ces* table from ever containing invalid *seriescode* values.

The information stored in the Workforce Information Database contains many different classification systems for occupations (DOT, SOC, OES, ONET, etc.), industries (NAICS and SIC) and training programs (various releases of CIP). The states may choose which classification system they are going to use. Some states may choose to classify occupations with ONET codes while other states may use SOC codes. Some states store data making use of several different classifications and some states are in the process of converting from one classification system to another thus needing to store data for both classifications.

Since its inception, the Workforce Information Database has provided a means for specifying more than one type of classification system in some of the data tables. For example, the *progcomp* table has a *code* field in which several different types of occupational codes (DOT, OES, SOC, etc.) can be used. The *progcomp* table's *codetype* field defines the type of code being used in a particular record. These *multi-code fields* provide flexibility in classifying the data, but can cause problems with data integrity.

All relational database systems require Foreign Keys to be a set of fixed conditions, with the data field having the same length as the Primary Key of the lookup table it references. Each Foreign Key constraint must reference only **one** lookup table. This restriction presents a problem when trying to set Foreign Key constraints on the multi-code fields in some of the Workforce Information tables. Since the length of the classification codes can vary (4 – 10 characters) and the lookup table to be referenced must be determined by the code-type, Foreign Key constraints cannot be set directly between the multi-code field and the lookup table that needs to be referenced.

In order to provide a means of enforcing Foreign Key constraints on the multi-code fields, two administrative tables were added to the Workforce Information Database. They are the *indcodes* and *occodes* tables. The *indcodes* table is designed to contain the code-type and code of all the industry classifications a state may be using. The *occodes* table is designed to contain all of the occupation and training classifications a state may be using. Each of these tables also contains the title associated with the classification code so these multi-code tables can also be used for application development.

Maintenance of the multi-code tables – *indcodes* and *occodes* – can present additional effort and responsibility for the Workforce Information Database Administrators. In order to minimize the efforts of the DBA, triggers have been identified as a means to maintain the multi-code tables that can be used universally. A **trigger** is a special kind of stored procedure that goes into effect when you modify data in a specified table using one of the data modification operations – UPDATE, INSERT, or DELETE. Triggers can query other tables and can include complex SQL statements. Triggers in the Workforce Information Database are used specifically to maintain the referential integrity of the multi-code tables with any changes that are made to the lookup tables. The advantage of using triggers is they are automatic on all logged operations. They are activated immediately after any modification to the table's data. Triggers are supported by most enterprise-level database systems.

Triggers should be added to each of the lookup tables that need to be represented in the multi-code tables. For example, the *soccode* table will have a trigger that executes whenever it is updated and it will automatically update the *occodes* table with the code and title changes made to the *soccode* table. Likewise, the *naicode* table will have triggers that will update the *indcodes* table with the code and title changes made to the *naicode* tables. **Lookup tables that should have triggers are identified in the Tables section and in the Load Order Document, Appendix A, with the triggerfish icon.**

A third administrative table – *statelst* – was added to support the trigger functionality. It will allow any state to use the sample triggers as-is without the need to customize for the stfps code. This functionality also applies to states that may store more than one states data in their database. The sample triggers and other sample code can be found at the webpages listed in the Contact Information and Links below.

### **A Word About Data Type Descriptions...**

One goal for the Workforce Information Database is to be both database and operating system independent. However, some conventions must be used for describing the database, and the field types used in this document generally are those used by MS SQL Server. Depending on the database management system being used, there may be differences in the way data types are defined/interpreted. For example, Database administrators who use PC-based database management systems, particularly MS Access, must adapt the structures found here to their database software. For these systems, two field types are involved: long text fields (varchar(**MAX**) and numeric fields with decimals (numeric(3,1). Adjustments to the variable descriptions used in this document for MS Access follow:

**MS Access:** MS Access uses memo fields for long text (through Access 2010; called "long text" in Access 2013). The length of an Access memo field is limited to 64,000 characters; a long text field is approximately 1 GB. Numeric fields with decimal places are defined as either single or double precision. In either case, the user can control the number of decimal places, but the length of the field is predetermined by the variable type. Single precision should be adequate for the variables in the Workforce Information Database.

## **Use of VARCHAR(MAX)**

In order to accommodate some of the large descriptor fields in the Workforce Information Database, ARC recommends using data type varchar(MAX) for the descriptor fields specified in this structure document. If your system does not support data type varchar(MAX), then use the largest varchar size your DBMS and/or organization allows.

**Workforce Information Database Administrators need to be aware of the fact that data type variations may exist depending on the system being used and they will need to adapt this structure for their particular database management system.**

## **DEPRECATION (*Outdated; use strongly discouraged*) of tables**

The Structure Committee of the Analyst Resource Center (ARC) periodically makes changes to tables in the Workforce Information Database (WID) in order to update, accommodate, and adapt the database for new technologies, users, and uses. In the effort to continually advance the database structure and not cause undue personnel and budget strains on our customers, "Deprecation" was chosen as the method to eliminate outdated features. The structure committee will identify tables and features to be deprecated along with their recommended alternatives.

Deprecation does not mean that a table cannot be used now, but rather is a warning that the table will be deleted in the future (typically three WID versions later). States may continue to use a deprecated table up to the version where it is deleted, and the ARC will continue to support that table up until that point.

**See Appendix C for a list of the currently deprecated tables.**

## Look-up Tables

### addressy

This table contains address type codes used in stfirms.

Field Name	Type	Constraint	Description
1. addressy	char(1)	Primary Key 1	Code for the address type used for the following fields in the St firms or Empdb tables: addressy, addressy1, addressy2, addressy3
2. addressdesc	varchar(60)		Description of the address type

### agegroup

A table containing codes for identifying age categories.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS code.
2. agegroup	char(2)	Primary Key	Code identifying the age group.
3. agegrpdesc	char(20)		Age group description.

#### Constraint Information

1. Foreign Key (agegroup.stfips) references (stfipstb.stfips)

### annsflg

This table contains the annual sales codes used in the empdb table.

Field Name	Type	Constraint	Description
1. annsflg	char(1)	Primary Key	Annual sales code.
2. annsdesc	varchar(40)		Description of the annual sales code.

### annslrng

A table of annual sales value ranges for the employers in the empdb table.

Field Name	Type	Constraint	Description
1. annsalrang	char(2)	Primary Key	Code for the annual sales range.
2. salrngdesc	varchar(20)		Description of the sales range code.

### areatype

A table containing identifiers for the geographic type, e.g.. MSA, SDA, county, city, township, etc.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS code.
2. areatype	char(2)	Primary Key	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. areatynname	varchar(40)		Descriptive title of the areatype.

#### Constraint Information

1. Foreign Key (areatype.stfips) references (stfipstb.stfips)

**bedtypes**

A table of business employment dynamics data types.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. bedtypcode	char(1)	Primary Key	Indicator of the type of data.
2. bedtypdesc	varchar(60)		Description of the BED data type.

**benefit**

Contains codes used for identifying benefit categories.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. benefit	char(1)	Primary Key	Code indicating type of benefit.
3. benedesc	varchar(40)		Descriptive title of the benefit.
<b>Constraint Information</b>			
1. Foreign Key (benefit.stfips) references (stfipstb.stfips)			

**benmark**

This table contains the benchmark years.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. benchmark	char(4)	Primary Key	Benchmark year used in the labforce and ces tables.
2. benchdesc	varchar(60)		Benchmark year description.

**careerclust**

This table contains a listing of the Department of Education Career Clusters.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. clustercode	char(2)	Primary Key	Career Cluster code
2. clustertitle	varchar(80)		Title of the Career Cluster
3. clusterdesc	varchar(MAX)		Description of the Career Cluster

**careerpaths**

A table of the Department of Education Career Pathways.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. pathcode	char(4)	Primary Key	Career Pathway code
2. pathtitle	varchar(115)		Title of the Career Pathway

**cenind****DEPRECATED in v2.8**

A table of the current series Census industry codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. cenind	char(4)	Primary Key	A 4-digit code assigned to the Census industry title.
2. codetype	char(2)	Primary Key 1	Code describing the Census industry code.
3. centitle	varchar(140)		The industry title used by the Census Bureau to classify industry data.

**Constraint Information**

1. Foreign Key (cenind.codetype) references (indtypes.codetype)

**Trigger Information**

Use triggers on INSERT, UPDATE or DELETE of cenind to maintain indcodes. (statelst.stfips, cenind.codetype, cenind.cenind, cenind.centitle) maintains (indcodes.stfips, indcodes.codetype, indcodes.code, indcodes.codetitle)

**censcode****DEPRECATED in v2.8**

A table of the current series Census occupation codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. censcode	char(4)	Primary Key	A 4-digit code assigned to the Census industry title.
2. codetype	char(2)	Primary Key 1	Code describing the Census occupation code.
3. censtitle	varchar(60)		The occupational title used by the Census Bureau to classify occupational data.

**Constraint Information**

1. Foreign Key (censcode.codetype) references (occtypes.codetype)

**Trigger Information**

Use triggers on INSERT, UPDATE or DELETE of censcode to maintain occcodes. (statelst.stfips, censcode.codetype, censcode.censcode, censcode.censtitle) maintains (occcodes.stfips, occcodes.codetype, occcodes.code, occcodes.codetitle)

**cescode****Revised in v2.8**

The table of Current Employment Statistics codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. seriescode	char(8)	Primary Key	Industry Series Code
3. seriesdesc	varchar(MAX)		Description of the industries comprising the series.
4. seriesstls	varchar(75)		Short title used to identify industry division.
5. seriesslll	varchar(200)		Long title used to describe industry division.
6. serieslvl	char(1)		Optional report indentation level.

**Constraint Information**

1. Foreign Key (cescode.stfips) references (stfipstb.stfips)

**cidscode**

The table of Career Information Delivery System codes.

Field Name	Type	Constraint	Description
1. cidscode	char(9)	Primary Key	A 9-digit code assigned to the Career Information Delivery System occupational title.
2. cidstitle	varchar(40)		Title of CIDS system occupation or program.
3. cidsdesc	varchar(MAX)		Description of CIDS system occupation or program.

**Trigger Information**

Use triggers on INSERT, UPDATE or DELETE of cidscode to maintain occcodes. (statelst.stfips, '07', cidscode.cidscode, cidscode.cidstitle) maintains (occcodes.stfips, occcodes.codetype, occcodes.code, occcodes.codetitle)

**cipcode****Revised in v2.8**

A table of the current Classification of Instructional Programs (CIP) codes, including 2, 4 and 6-digit codes.

Field Name	Type	Constraint	Description
1. cipcode	char(10)	Primary Key	A 10-digit code assigned to a Classification of Instructional Programs (CIP) program title.
2. cipcodetype	char(2)	Primary Key 1	A code describing the CIP version classification code
3. ciptitle	varchar(200)		The instructional program title used to organize training related data, i.e., enrollments, completers, placement.
4. cipdesc	varchar(MAX)		A definition of the curriculum included in an instructional program.
5. ciptits	varchar(75)		A short version of the CIP title used for screen display.
6. cplevel	char(1)		Indicator of the hierarchical level of the CIP code.

**Constraint Information**

1. Foreign Key (cipcode.cipcodetype) references (occtypes.codetype)

**Trigger Information**

Use triggers on INSERT, UPDATE or DELETE of cipcode to maintain occcodes.(statelst.stfips, cipcode.codetype, cipcode.cipcode, cipcode.ciptitle) maintains (occcodes.stfips, occcodes.codetype, occcodes.code, occcodes.codetitle)

**classtime**

The table of class time codes.

Field Name	Type	Constraint	Description
1. classtime	char(1)	Primary Key	Class time code.
2. classtimetitle	varchar(40)		Description or title of the class time.

**cluscode**

The table of cluster (or unit of analysis) codes used in the state.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. cluscode	char(10)	Primary Key	Code assigned to the cluster from the State Units of Analysis.
3. clustitle	varchar(60)		Title assigned to the cluster from the State Units of Analysis.
4. clusdesc	varchar(MAX)		A free form text column intended to contain descriptive data regarding this cluster in this state.

**Constraint Information**

1. Foreign Key (cluscode.stfips) references (stfipstb.stfips)

**Trigger Information**

Use triggers on INSERT, UPDATE or DELETE of cluscode to maintain occcodes. (cluscode.stfips, '01', cluscode.cluscode, cluscode.clustitle) maintains (occcodes.stfips, occcodes.codetype, occcodes.code, occcodes.codetitle)

**clusgrad****DEPRECATED in v2.8**

The table of Cluster evaluative rating codes.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. clusgrade	char(1)	Primary Key	An evaluative rating code for the cluster.
3. clusgrdesc	varchar(40)		Description or title of the cluster rating.

**Constraint Information**

1. Foreign Key (clusgrad.stfips) references (stfipstb.stfips)

**compltyp**

The table of program completer types, by state.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. compltype	char(2)	Primary Key	A 2-digit code representing type of program completer.
3. compltitle	varchar(40)		Title of type of program completer.
4. compldesc	varchar(MAX)		Description of type of program completer.

**Constraint Information**

1. Foreign Key (compltyp.stfips) references (stfipstb.stfips)

**contactpro**

The table of contact professional titles.

Field Name	Type	Constraint	Description
1. contactprotitile	char(3)	Primary Key	Contact's professional title.
2. contactprodesc	varchar(35)		Description of the contact's professional title.

## **contacttitle**

The table of the contact title codes.

Field Name	Type	Constraint	Description
1. contacttitlecode	char(1)	Primary Key	Contact title code.
2. contacttitledesc	varchar(35)		Contact's descriptive title.

## **cpisource**

Table of codes for the source of Consumer Price Index data.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. cpisource	char(1)	Primary Key	Source code for CPI data.
3. cpisrcdesc	varchar(40)		Description of CPI source.
<b>Constraint Information</b>			
1. Foreign Key (cpisource.stfips) references (stfipstb.stfips)			

## **cpitype**

The table of Consumer Price Index (CPI) types of measure.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. cpitype	char(2)	Primary Key	A 2-digit code assigned to the type of CPI measure.
3. cpititle	varchar(55)		Title of the CPI measure.
4. cpidesc	varchar(200)		Description of the CPI measure.
<b>Constraint Information</b>			
1. Foreign Key (cpitype.stfips) references (stfipstb.stfips)			

## **creditcd**

The table of credit codes, used in the empdb table.

Field Name	Type	Constraint	Description
1. creditcd	char(1)	Primary Key	Credit code
2. creditdesc	varchar(MAX)		Description of types of credit codes.

## **disabil**

**DEPRECATED in v2.8**

A table of codes for identifying those who are disabled.

Field Name	Type	Constraint	Description
1. disabled	char(1)	Primary Key	Code indicating disabled applicants.
2. disabldesc	varchar(20)		Description of disability code.

## **disadvan**

**DEPRECATED in v2.8**

A table of codes for identifying those who are economically disadvantaged.

Field Name	Type	Constraint	Description
1. econdisadv	char(1)	Primary Key	Code indicating those who are economically disadvantaged.
2. ecodisdesc	varchar(30)		Description of economically disadvantaged code.

**dislocat****DEPRECATED in v2.8**

A table of codes for identifying whether workers are dislocated workers.

Field Name	Type	Constraint	Description
1. dislocated	char(1)	Primary Key	Code indicating dislocated workers.
2. dislocdesc	varchar(20)		Description of dislocated worker code.

**dotcode****DEPRECATED in v2.6**

The table of the 1991 version of Dictionary of Occupational Titles codes.

Field Name	Type	Constraint	Description
1. dotcode	char(9)	Primary Key	A 9-digit code assigned to the Dictionary of Occupational Titles (DOT) occupational title.
2. dottitle	varchar(75)		Title used to classify occupation in the Dictionary of Occupational Titles.
3. gedr	char(1)		A 1-digit code ranging from 1 to 6 assigned to the level of General Educational Development for Reasoning required for the occupation.
4. gedm	char(1)		A 1-digit code ranging from 1 to 6 assigned to the level of General Educational Development for Math required for the occupation.
5. gedl	char(1)		A 1-digit code ranging from 1 to 6 assigned to the level of General Educational Development for Language required for the occupation.
6. svp	char(1)		Level of Specific Vocational Preparation required for the occupation.

**Trigger Information**

Use triggers on INSERT, UPDATE or DELETE of dotcode to maintain occcodes. (statelst.stfips, '04', dotcode.dotcode, dotcode.dottitle) maintains (occcodes.stfips, occcodes.codetype, occcodes.code, occcodes.codetitle)

**dwvertyp****DEPRECATED in v2.8**

The table of dislocated worker event types, used in mass layoff statistics.

Field Name	Type	Constraint	Description
1. dwvertype	char(1)	Primary Key	Code for the type of dislocated worker event.
2. dwevetdesc	varchar(40)		Description or title of dislocated worker event.

**education**

Table of BLS education categories.

Field Name	Type	Constraint	Description
1. educat	char(1)	Primary Key	Code assigned to the education category by BLS
2. educatdesc	varchar(35)		Description of the education category

**edulevel**

A table containing codes for identifying education levels.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. edulevel	char(1)	Primary Key	Code indicating education level required.
3. edulvldesc	varchar(40)		Descriptive title of the education level.
<b>Constraint Information</b>			
1. Foreign Key (edulevel.stfips) references (stfipstb.stfips)			

**eeo1cat****DEPRECATED in v2.6**

A table of Equal Employment Opportunity (EEO) 1 category codes, primarily used by private industry.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. eeo1cat	char(2)	Primary Key	A 2-digit code assigned to EEO-1 Job Categories.
2. eeo1title	varchar(50)		Title of the EEO-1 Category.

**eeostloc****DEPRECATED in v2.6**

A table of Equal Employment Opportunity (EEO) State and Local category codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. eeostoc	char(2)	Primary Key	A 2-digit code assigned to EEO State and Local Job Categories.
2. eeostloctl	varchar(50)		Title of the EEO State and Local Category.

**empszflg**

A table of employment size flag codes used in the empdb table.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. empsizflg	char(1)	Primary Key	Code for the size flag
2. empflgdesc	varchar(40)		Description of the size flag.

**empszrng**

A table of size range codes used in the empdb table.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. empsizrng	char(2)	Primary Key	Code for the size range.
2. emprngdesc	varchar(40)		Description of the size range.

**eventtyp**

The table of mass layoff event types, either federal or state events.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. eventtype	char(1)	Primary Key	Code for the type of event.
2. eventdesc	varchar(40)		Description or title of event.

**experience**

Table of experience needed codes from BLS.

Field Name	Type	Constraint	Description
1. expercat	char(1)	Primary Key	Code assigned to the work experience category by BLS
2. expercatdesc	varchar(20)		Description of the experience code

**explevel**

A table containing identifiers for the experience level.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. explevel	char(1)	Primary Key	Code identifying the experience level required.
3. explvldesc	varchar(40)		Descriptive title of the experience level.
<b>Constraint Information</b>			
1. Foreign Key (explevel.stfips) references (stfipstb.stfips)			

**gender**

A table containing codes for identifying gender of UI Claimants.

Field Name	Type	Constraint	Description
1. gender	char(1)	Primary Key	Gender code.
2. genderdesc	varchar(12)		Gender description.

**geocode**

A table of the levels of precision possible for the geocode.

Field Name	Type	Constraint	Description
1. geocode	char(1)	Primary Key	Code for the precision level of the geocode.
2. geopdesc	varchar(40)		Description of the precision geocode.

<b>geog</b>			
A table containing geographic area descriptor records.			
Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. areaname	varchar(60)		Geographic area name.
5. areadesc	varchar(MAX)		Narrative description of a geographic area.
6. latitude	numeric(11,6)		geographic coordinate specifying north-south position on the Earth
7. longitude	numeric(11,6)		geographic coordinate specifying east-west position on the Earth
8. geocode	char(1)	2	geocode precision level code. The precision of the longitude and latitude coordinates.
<b>Constraint Information</b>			
1. Foreign Key (geog.stfips, geog.areatype) references (areatype.stfips, areatype.areatype)			
2. Foreign Key (geog.geocode) references (geocode.geocode)			

<b>growcode</b>			
A table of state-specific growth codes describing an industry or occupation.			
Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. growcode	char(2)	Primary Key	Code for the state-specific growth descriptor.
3. growdesc	varchar(20)		Brief description interpreting the growth of the industry or occupation.
<b>Constraint Information</b>			
1. Foreign Key (growcode.stfips) references (stfipstb.stfips)			

<b>incomtyp</b>	<b>Revised in v2.8</b>		
A table containing types of income measures.			
Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. inctype	char(2)	Primary Key	Code for the type of income measure.
3. incdesc	varchar(75)		Income measure description.
<b>Constraint Information</b>			
1. Foreign Key (incomtyp.stfips) references (stfipstb.stfips)			

**incsourc**

Codes for the source of income and population estimates for the income table.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. incsource	char(1)	Primary Key	Source Code for income data.
3. incsrcdesc	varchar(40)		Description of income source.

**Constraint Information**

1. Foreign Key (incsourc.stfips) references (stfipstb.stfips)

**inndir**

Revised in v2.8

A table containing a directory of MicroMatrix level industry codes for which projections are performed.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1, 2	State FIPS Code.
2. matincode	char(15)	Primary Key	Industry code from Micro Matrix.
3. periodid	char(2)	Primary Key 1	A 2-digit code identifying the type of period used.
4. matincoqty	char(1)		A code to identify matincode as SIC code based or NAICS code based; 1 = SIC based, 2 = NAICS based
5. matintitle	varchar(200)		Industry title.
6. subtot	char(1)	2	Sum level of the information
7. ownership	char(2)	3	A 2-digit indicator that identifies the employer by public or private ownership.

**Constraint Information**

1. Foreign Key (inndir.stfips, inndir.periodid) references (periodid.stfips, periodid.periodid)
2. Foreign Key (inndir.stfips, inndir.subtot) references (indsub.stfips, indsub.subtot)
3. Foreign Key (inndir.stfips, inndir.ownership) references (ownershp.stfips, ownershp.ownerships)

**inndiv**

A table of the industry divisions.

Field Name	Type	Constraint	Description
1. inddiv	char(3)	Primary Key	A code used to identify industry division. Differs from sicdiv code in that Manufacturing is divided into Durable and Nondurable goods, and trade is divided into Wholesale and Retail Trade.
2. indtitle	varchar(60)		Title used to identify the industry division.

**indsub**

A table containing a lookup of industry sum level information.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. subtot	char(1)	Primary Key	Sum level of the information.
3. subtodesc	varchar(60)		Sum level description.

**Constraint Information**

1. Foreign Key (indsub.stfips) references (stfipstb.stfips)

## **indtypes**

The table of industry code types used throughout the WID database.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. codetype	char(2)	Primary Key	Code describing the type of industry classification code.
2. codetydesc	varchar(40)		Title of classification Code.

## **insttown**

A table of training institution ownership codes and descriptions.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. insttown	char(1)	Primary Key	Institution ownership code.
2. insttowndes	varchar(40)		Description or title of training institution owner.

## **insttype**

The table of institution types in a state.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code
2. insttype	char(2)	Primary Key	Identifies the type of training institution (WIA Provider, vocational center, community college, university).
3. insttydesc	varchar(50)		A description of the type of institution.

### **Constraint Information**

1. Foreign Key (insttype.stfips) references (stfipstb.stfips)

## **iospecialid**

A table for users to identify industries and occupations that are in special categories, e.g. Green jobs, high-tech. etc.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 2	State FIPS code
2. indcodety	char(2)	Primary Key 1	Code describing the industry code type.
3. indcode	char(6)	Primary Key 1	A code used in the classification of establishments by type of activity in which they are engaged. For codes not 6 characters long, left justify and blank (ASCII 32) fill. Either SIC or NAICS code can be used.
4. occodetype	char(2)	Primary Key 2	Code describing the type of occupational coding system
5. occcode	char(10)	Primary Key 2	The occupational classification code used by the state for this data element. This code could be a DOT, OES, SOC, CENSUS, etc. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
6. green	char(1)		0 = not green; 1 = green
7. pctgreen	numeric(9,3)		Percent that industry/occupation is deemed green.

### **Constraint Information**

1. Foreign Key (iospecialid.stfips, iospecialid.indcodety, iospecialid.indcode) references (indcodes.stfips, indcodes.codetype, indcodes.code)
2. Foreign Key (iospecialid.stfips, iospecialid.occodetype, iospecialid.occcode) references (occcodes.stfips, occcodes.codetype, occcodes.code)

**itemcpi**

A table of market basket items included in the CPI.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. cpiitem	char(9)	Primary Key	Code for the items in the Index
2. itemdesc	varchar(100)		Description of the items in the index (e.g., all items, food, energy, etc.)

**jobfamly****DEPRECATED in v2.6**

A table of job families used in the America's Job Bank Menu Search.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. jobfamily	char(2)	Primary Key	Job family code assigned to the America's Job Bank.
2. famtitle	varchar(60)		Job family title.
3. familydesc	varchar(MAX)		Description of job family.

**laytitle**

A table of lay titles and codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. laylcode	char(5)	Primary Key	Lay title code
2. laytitle	varchar(200)		Lay title associated with an occupation.

**Table Notes**

1: The value of laylcode is recalculated with each release of the lay title database. The code associated with any title may change from one release to the next.

**lengthopen**

A table containing codes for identifying length-open categories.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. lengthopen	char(1)	Primary Key	Code indicating range of how long vacancy has been open.
3. lodesc	varchar(40)		Length-open categories description.

**Constraint Information**

1. Foreign Key (lengthopen.stfips) references (stfipstb.stfips)

**lentype**

A table of training program lengths.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code
2. lengthtype	char(2)	Primary Key	The identifying code assigned to the program length.
3. lentypdesc	varchar(40)		A description of the length of the assigned program length code.

**Constraint Information**

1. Foreign Key (lentype.stfips) references (stfipstb.stfips)

<b>leveltyp</b>			
A table of wage levels identified by an occupation (e.g. entry, apprentice, journeyman, experienced, etc.)			
Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. leveltype	char(1)	Primary Key	The code identifying the type of wage level.
3. lvidesc	varchar(40)		A description of the type of wage level.
<b>Constraint Information</b>			
1. Foreign Key (leveltyp.stfips) references (stfipstb.stfips)			

<b>liccontinuingedu</b>			
Lookup table of the continuing education requirements of the license			
Field Name	Type	Constraint	Description
1. licensecontinuingedu	char(1)	Primary Key	Indicator of license continuing education requirements
2. continuingedudesc	varchar(50)		Description of continuing education requirements for license

<b>licenseactivestatus</b>			
Lookup table of the active status of the license			
Field Name	Type	Constraint	Description
1. licensestatus	char(1)	Primary Key	Indicator of license status
2. licensestatusdesc	varchar(25)		Description of license status

<b>licensecertification</b>			
Lookup table of the certification requirements of the license			
Field Name	Type	Constraint	Description
1. licensecertification	char(1)	Primary Key	Indicator of license certification requirements
2. licensecertdesc	varchar(60)		Description of license certification requirements

<b>licensecriminal</b>			
Lookup table of licensing restrictions on criminal records			
Field Name	Type	Constraint	Description
1. licensecriminal	char(1)	Primary Key	Indicator of criminal records requirements for the license
2. licensecriminaldesc	varchar(50)		Description of the criminal records requirements for the license

<b>licenseeducation</b>			
Lookup table of the education requirements of the license			
Field Name	Type	Constraint	Description
1. licenseeducation	char(1)	Primary Key	Indicator of educational requirements for the license
2. educationdesc	varchar(25)		Description of the educational requirements

**licenseexams**

New Table in v2.8

Lookup table of the exam requirements of the license

Field Name	Type	Constraint	Description
1. licenseeexam	char(1)	Primary Key	Indicator of exams required for the license
2. examdesc	varchar(50)		Description of the exam requirements

**licenseexperience**

New Table in v2.8

Lookup table of the experience requirements of the license

Field Name	Type	Constraint	Description
1. licenseeexperience	char(1)	Primary Key	Indicator of experience required for the license
2. experiencedesc	varchar(30)		Description of the experience required

**licensephysicalreqs**

New Table in v2.8

Lookup table of physical requirements of the license

Field Name	Type	Constraint	Description
1. licensephysical	char(1)	Primary Key	Indicator of the physical requirements for the license
2. physicaldesc	varchar(50)		Description of the physical requirements

**licensetypes**

New Table in v2.8

Look-up table for the indicators of the type of license

Field Name	Type	Constraint	Description
1. licensetype	char(1)	Primary Key	Code for the license type
2. licensetypedesc	varchar(50)		Description of the license type

**licenseveteran**

New Table in v2.8

Codes indicating the veteran preference for a license

Field Name	Type	Constraint	Description
1. licveteran	char(1)	Primary Key	Code indicating any veteran's preference of the license
2. licveterandesc	varchar(75)		Description of the veteran preferences

**licnumty**

The table of type codes used in the lichist table.

Field Name	Type	Constraint	Description
1. licnumtype	char(2)	Primary Key	Code for the type of statistic.
2. licnumdesc	varchar(50)		Description of the type of statistic.

**locstat**

The table of location status code types used in the empdb table.

Field Name	Type	Constraint	Description
1. locstat	char(1)	Primary Key	Code for the location status.
2. locstdesc	varchar(40)		Description of the location status.

**meeicode**

The table of multi-establishment indicator codes from QCEW.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. meeicode	char(1)	Primary Key	The Multi-Establishment Employer Indicator code.
2. meeidesc	varchar(40)		Description or title of the MEEI code.

**mlssepcat****DEPRECATED in v2.8**

A table of higher-level categories for MLS separation codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. mlssepcategory	char(4)	Primary Key	Business reason category for the MLS separation codes.
2. mlssepcatdesc	varchar(50)		Description of the business reason category.

**mlssepcd****DEPRECATED in v2.8**

The table of MLS separation codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. mlssepcodetype	char(2)	Primary Key 1	Code indicating which series of separation codes the code belongs to.
2. mlssepcd	char(2)	Primary Key	The separation code used in the MLS tables for the following fields; prisepcd, secsepdc
3. mlssepdesc	varchar(40)		Description or title of the separation code.
4. mlssepcategory	char(4)	2	Business reason category for the MLS separation code.

**Constraint Information**

1. Foreign Key (mlssepcd.mlssepcodetype) references (mlssepcdtype.mlssepcodetype)
2. Foreign Key (mlssepcd.mslsepcategory) references (mlssepcat.mlssepcategory)

**mlssepcdtype****DEPRECATED in v2.8**

Table of codes indicating the version of the MLS separation codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. mlssepcodetype	char(2)	Primary Key	MLS series code.
2. mlssepcdtypdesc	varchar(50)		Description of the MLS code series.
3. mlsseptypeffdate	char(8)		Date that the MLS code series became effective. Format: yyyyymmdd.

**moccode**

The table of the Military Occupational Codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. svc	char(1)	Primary Key 1	Service Branch code.
2. mpc	char(1)	Primary Key 2	Military Personnel Category code.
3. status	char(1)	Primary Key	Military Occupation Status: A=Active occupation; O=Obsolete occupation
4. moccode	char(10)	Primary Key	A 10-digit Military Occupational Code.
5. moctitle	varchar(200)		Title of MOC Code.
6. mocdesc	varchar(MAX)		Description of MOC Code.
<b>Constraint Information</b>			
1. Foreign Key (moccode.svc) references (svc.svc) 2. Foreign Key (moccode.mpc) references (mpc.mpc)			

**mpc**

A table for military personnel category codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. mpc	char(1)	Primary Key	Military Personnel Category code.
2. mpdesc	varchar(70)		Description of the Military Personnel Category.

**naiccode**

The table of North American Industry Classification System codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. naicscode	char(6)	Primary Key	A code used in the North American Industry Classification System (NAICS).
2. naicstitle	varchar(75)		Title assigned to the NAICS code.
3. naicstittl	varchar(200)		The long title assigned to the NAICS code.
4. naicsdesc	varchar(MAX)		A narrative description of the activities performed by the establishment in this NAICS code.
5. naicslvl	char(1)	1	A code that indicates the hierarchical level of the NAICS industry code.
6. naicsect	char(2)	2	A code used to represent the NAICS industry sectors.

**Constraint Information**

- 1. Foreign Key (naiccode.naicslvl) references (naicslvl.naicslvl)
- 2. Foreign Key (naiccode.naicsect) references (naicsect.naicsect)

**Trigger Information**

Use triggers on INSERT, UPDATE or DELETE of naiccode to maintain indcodes. (statelst.stfips, '10', naiccode.naicscode, naiccode.naicstitle) maintains (indcodes.stfips, indcodes.codetype, indcodes.code, indcodes.codetitle)

**naicdom**

A table of NAICS Domains, aggregations of Supersectors as defined by BLS extensions of NAICS.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. naicdomain	char(3)	Primary Key	A code that represents a Domain in the BLS extensions to the North American Industry Classification System (NAICS).
2. domainititl	varchar(25)		Title assigned to the Domain.

**naicsect**

The table of North American Industry Classification System (NAICS) industry Sectors.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. naicsect	char(2)	Primary Key	A code used to represent the NAICS industry sectors.
2. sectdesc	varchar(45)		A short description of the NAICS industry sector.
3. sectdescl	varchar(120)		A long description of the NAICS industry sector.
4. naicsuper	char(4)	1	Code for a BLS defined NAICS Supersector.
<b>Constraint Information</b>			
1. Foreign Key (naicsect.naicsuper) references (naicsupr.naicsuper)			

**naicslvl**

A table of the hierarchical level of the codes in the North American Industry Classification System (NAICS).

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. naicslvl	char(1)	Primary Key	A code that indicates the hierarchical level of the NAICS industry code.
2. leveldesc	varchar(40)		A description of the hierarchical level of the NAICS industry code.

**naicsupr**

The table of NAICS Supersectors, defined by BLS official extensions to NAICS.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. naicsuper	char(4)	Primary Key	A code used to represent a Supersector as defined in the official BLS extensions to the North American Industry Classification System (NAICS).
2. supertitle	varchar(35)		Title assigned to the Supersector.
3. naicdomain	char(3)	1	Code for a BLS defined NAICS Domain.

**Constraint Information**

1. Foreign Key (naicsupr.naicdomain) references (naicdom.naicdomain)

**Table Notes**

1: Supersector 1030 - Tribal employment has been added for those states that needed. All others can ignore this code.

<b>occdir</b>			
A table of Micro Matrix occupation codes for which projections are performed.			
<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 2	State FIPS Code.
2. matocode	char(10)	Primary Key	Occupation code from Micro Matrix. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
3. periodid	char(2)	Primary Key 1	A 2-digit code identifying the type of period used.
4. matoccodty	char(1)		A code to identify matocode as 9 char and OES code based or 10 char and SOC code based. 1 = OES based, 2 = SOC based
5. matocctitl	varchar(200)		Occupation title.
6. subtot	char(1)	2	Sum level of the information

**Constraint Information**

1. Foreign Key (occdir.stfips, occdir.periodid) references (periodid.stfips, periodid.periodid)
2. Foreign Key (occdir.stfips, occdir.subtot) references (occsub.stfips, occsub.subtot)

<b>occsub</b>			
A table of occupation summary level information.			
<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. subtot	char(1)	Primary Key	Sum level of the information.
3. subtotdesc	varchar(60)		Sum level description.

**Constraint Information**

1. Foreign Key (occsub.stfips) references (stfipstb.stfips)

<b>occtypes</b>			
The table of occupation and training code types used in the WID database.			
<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. codetype	char(2)	Primary Key	Code describing the type of occupation or training classification code.
2. codetydesc	varchar(40)		Title of classification Code.

**oescode****DEPRECATED in v2.6**

The table of OES occupation codes contained in the OES Survey Dictionary.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. oescode	char(5)	Primary Key	A 5-digit code assigned to the Occupation Employment Statistics (OES) occupational title.
2. oestitle	varchar(60)		The occupational title used in the OES program to collect employment data.
3. oesdesc	varchar(MAX)		A narrative summary of the tasks and duties performed by workers classified in the occupation.
4. oestrntm	char(1)	1	A 1-digit code assigned to the OES preparation level.
5. oestitles	varchar(35)		Short OES title for screen display.
6. oohtnrtm	char(1)	2	A code assigned to the category of education and/or training generally required to enter an occupation and for workers to develop the skills needed for average job performance in the occupation.
7. oesgroup1	varchar(3)	3	Specifies first level OES group.
8. oesgroup2	varchar(2)	3	Specifies second level OES group.
9. oesgroup3	varchar(2)	3	Specifies third level OES group.

**Constraint Information**

1. Foreign Key (oescode.oestrntm) references (oestrntm.oestrntm)
2. Foreign Key (oescode.oohtnrtm) references (oohtnrtm.oohtnrtm)
3. Foreign Key (oescode.oesgroup1, oescode.oesgroup2, oescode.oesgroup3) references (oesgroup.oesgroup1, oesgroup.oesgroup2, oesgroup.oesgroup3)

**Trigger Information**

Use triggers on INSERT, UPDATE or DELETE of oescode to maintain occcodes. (statelst.stfips, '02', oescode.oescode, oescode.oestitle) maintains (occcodes.stfips, occcodes.codetype, occcodes.code, occcodes.codetitle)

**oesgroup****DEPRECATED in v2.6**

A table of OES groups, defined as a combination of three levels.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. oesgroup1	varchar(3)	Primary Key	First level OES group.
2. oesgroup2	varchar(2)	Primary Key	Second level OES group.
3. oesgroup3	varchar(2)	Primary Key	Third level OES group.
4. grpdesc	varchar(90)		Description of group.

**oeslaytl****DEPRECATED in v2.6**

A table of lay titles and the associated OES codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. oescode	char(5)	Primary Key 1	A 5-digit code assigned to the Occupational Employment Statistics (OES) occupational title.
2. laytitle	varchar(80)	Primary Key	Lay title associated with an OES code.

**Constraint Information**

1. Foreign Key (oeslaytl.oescode) references (oescode.oescode)

**oestrntm****DEPRECATED in v2.6**

A table of OES Training Times - estimates of the typical preparation level required to enter the occupation.

Field Name	Type	Constraint	Description
1. oestrntm	char(1)	Primary Key	A 1-digit code assigned to the OES preparation level.
2. oestmdesc	varchar(40)		Description of the specified preparation level.

**onetcode**

The table of O\*NET codes and their descriptions.

Field Name	Type	Constraint	Description
1. onetcode	char(8)	Primary Key	A 6 or 8-digit code* assigned to the Occupational Information Network (O*NET) occupational title. For codes not 8 characters long, left justify and blank (ASCII 32) fill.
2. onetyear	char(4)		O*NET code version year.
3. onetver	char(6)		O*NET code version id.
4. onetttitle	varchar(200)		Title of O*NET Code.
5. onetdesc	varchar(MAX)		Description of the specified O*NET code.

**Trigger Information**

Use triggers on INSERT, UPDATE or DELETE of onetcode to maintain occcodes. (statest.stfips, '12', onetcode.onetcode, onetcode.onetttitle) maintains (occcodes.stfips, occcodes.codetype, occcodes.code, occcodes.codetitle)

**oohtrntm**

The table of training required to enter an occupation or develop the skills needed for average job performance in the occupation.

Field Name	Type	Constraint	Description
1. oohtrntm	char(1)	Primary Key	A code assigned to the category of education and/or training generally required to enter an occupation and for workers to develop the skills needed for average job performance in the occupation.
2. oohtmdesc	varchar(60)		A description of the training category.

**ownership**

The table of codes for each type of ownership.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. ownership	char(2)	Primary Key	A 2-digit indicator that identifies the employer by public or private ownership.
3. ownertitle	varchar(40)		Title of ownership.
4. ownerdesc	varchar(MAX)		Description of ownership.

**Constraint Information**

1. Foreign Key (ownership.stfips) references (stfipstb.stfips)

## **paytype**

A table of the types of government transfer payments received.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. paytype	char(2)	Primary Key	A 2-digit code identifying the government payment type.
3. paytydesc	varchar(40)		A description of the type of government payment.

### **Constraint Information**

1. Foreign Key (paytype.stfips) references (stfipstb.stfips)

## **period**

The table of time periods used in the WID.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. periodyear	char(4)	Primary Key	Character representation of the calendar year (e.g. 2000).
2. periodtype	char(2)	Primary Key 1	Code describing type of period (e.g. Annual, quarterly, monthly, etc.)
3. period	char(2)	Primary Key	Period code.

### **Constraint Information**

1. Foreign Key (period.periodtype) references (periodty.periodtype)

## **periodid**

A table of periods of time used for projections, a 2-digit indicator for target year and base year.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS code.
2. periodid	char(2)	Primary Key	A 2-digit code identifying the type of period being used.
3. periodtype	char(2)	2, 3	Code describing type of period (e.g. Annual, quarterly, monthly, etc.)
4. estyear	char(4)	2	Base year of estimate.
5. estperiod	char(2)	2	Period of estimate.
6. projyear	char(4)	3	Year of projection.
7. projperiod	char(2)	3	Period of projection.
8. perioddesc	varchar(60)		Description of period range.

### **Constraint Information**

1. Foreign Key (periodid.stfips) references (stfipstb.stfips)
2. Foreign Key (periodid.estyear, periodid.periodtype, periodid.estperiod) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (periodid.projyear, periodid.periodtype, periodid.projperiod) references (period.periodyear, period.periodtype, period.period)

## **periodty**

The table of types of time periods used (e.g. Annual, quarterly, hourly, etc.)

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. periodtype	char(2)	Primary Key	Code describing type of period (e.g. Annual, quarterly, monthly, etc.)
2. pertypdesc	varchar(40)		A description of the period type.

**popsource**

A Table of the codes of the source of population estimates.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. popsource	char(1)	Primary Key	Source code for population data.
3. popsrcdesc	varchar(40)		Description of population source.
<b>Constraint Information</b>			
1. Foreign Key (popsource.stfips) references (stfipstb.stfips)			

**prvgovst**

A table of private/government status codes used in the empdb.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. privgovsta	char(1)	Primary Key	Code for the private/government status code.
2. prvgovdesc	varchar(15)		Description of the code.

**qwisup**

A table containing quarterly workforce indicator (QWI) suppression code descriptions.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. qwisup	char(1)	Primary Key	Code for QWI suppression type
2. qwisupdesc	varchar(75)		Description of QWI suppression code

**qwitype**

This table contains quarterly workforce indicator (QWI) code type descriptions.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. qwitype	char(2)	Primary Key	Code for the QWI type.
2. qwitypdesc	varchar(75)		Description of the QWI type

**raceethn**

The table of codes that identify ethnicity and race of UI claimants and other groups.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. raceethn	char(5)	Primary Key	Race/ethnicity code.
2. racetitle	varchar(75)		Race/ethnicity description.

**Table Notes**

1: See Appendix B for notes on the Race-Ethnicity codes.

**ratetype**

A table of wage rate types (e.g. hourly, weekly, monthly, annually).

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. ratetype	char(1)	Primary Key	Code which identifies the type of wage rate.
2. ratetydesc	varchar(40)		A description of the type of wage rate.

**salestyp**

A table of sales statistic types.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. salestype	char(2)	Primary Key	A code that represents the sales type.
3. saletydesc	varchar(40)		A description of the sales type.
<b>Constraint Information</b>			
1. Foreign Key (salestyp.stfips) references (stfipstb.stfips)			

**schgrade**

A table containing codes for identifying the highest school grade completed.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. highestgrd	char(2)	Primary Key	Code identifying the highest school grade completed.
3. highgrdesc	varchar(35)		Description of highest school grade completed code.
<b>Constraint Information</b>			
1. Foreign Key (schgrade.stfips) references (stfipstb.stfips)			

**seasonal**
**DEPRECATED in v2.8**

A table containing codes for identifying those who are seasonal or migrant workers.

Field Name	Type	Constraint	Description
1. seasonal	char(1)	Primary Key	Code indicating seasonal or migrant workers.
2. seasondesc	varchar(20)		Description of seasonal code.

**siccode****DEPRECATED in v2.6**

The table of 1987 Standard Industrial Classification (SIC) codes.

Field Name	Type	Constraint	Description
1. siccode	char(4)	Primary Key	A code used in the classification of establishments by type of activity in which they are engaged. This field is left justified and padded with zeroes. A siccode of 9999 means non-classifiable; industry not specified.
2. sictitle	varchar(38)		The title assigned to a SIC code.
3. sictitlел	varchar(110)		The long title assigned to the SIC code.
4. sicdesc	varchar(MAX)		A narrative description of the activities performed by establishments classified in the SIC.
5. sicdiv	char(1)	1	The major industry division to which this code belongs.
6. siclevel	char(1)	2	A code that indicates the hierarchical level of the SIC code.
7. inddiv	char(3)	3	A code used to identify industry division. Differs from sicdiv code in that Manufacturing is divided into Durable and Nondurable goods, and trade is divided into Wholesale and Retail Trade.

**Constraint Information**

1. Foreign Key (siccode.sicdiv) references (sicdiv.sicdiv)
2. Foreign Key (siccode.siclevel) references (siclevel.siclevel)
3. Foreign Key (siccode.inddiv) references (inddiv.inddiv)

**Trigger Information**

Use triggers on INSERT, UPDATE or DELETE of siccode to maintain indcodes. (statelst.stfips, '05', siccode.siccode, siccode.sictitle) maintains (indcodes.stfips, indcodes.codetype, indcodes.code, indcodes.codetitle)

**sicdiv****DEPRECATED in v2.6**

A table of SIC major industry divisions (1987).

Field Name	Type	Constraint	Description
1. sicdiv	char(1)	Primary Key	A code used to represent the major SIC division.
2. divdesc	varchar(40)		A narrative description of the Major SIC Division title.

**siclevel****DEPRECATED in v2.6**

A table of the hierarchical levels of the SIC codes.

Field Name	Type	Constraint	Description
1. siclevel	char(1)	Primary Key	A code that indicates the hierarchical level of the SIC code.
2. leveldesc	varchar(40)		A description of the hierarchical level of the industry.

**sizeclas**

A table of codes for the size of an establishment's workforce. First 10 codes are QCEW codes, the rest are for states' use.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. sizeclass	char(2)	Primary Key	A 2-digit code identifying the size of the establishment's workforce.
3. sizedesc	varchar(40)		Description or title of sizeclass.
<b>Constraint Information</b>			
1. Foreign Key (sizeclas.stfips) references (stfipstb.stfips)			

**soccode**

Revised in v2.8

The table of the current Standard Occupational Classification (SOC) codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. soccode	char(6)	Primary Key	A 6-digit code assigned to the SOC occupational title from the current SOC Classification System.
2. soccodetype	char(2)	Primary Key 1	A code describing the SOC version classification code
3. soctitle	varchar(75)		The title assigned to that SOC occupation. *Note: No standard short titles are currently available.
4. soctitl1	varchar(200)		The long title assigned to the SOC occupation.
5. socdesc	varchar(MAX)		A narrative description of the SOC occupational title.
6. education	char(1)	2	Typical education needed for entry into the occupation
7. experience	char(1)	3	Work experience in a related occupation
8. training	char(1)	4	On-the-job training needed to attain competency in the occupation
9. oesflag	char(1)		Flag indicating whether the occupation is an OES-only occupation: 0 = SOC occupation; 1 = OES only occupation
10. socparent	char(6)	5	Parent SOC code to use for rollup.
11. socparentcodetyp	char(2)	5	Version code for SOC parent
12. oohtnrm	char(1)	6	Code assigned for education/training category. This is a legacy code system included for storing historical data.

**Constraint Information**

1. Foreign Key (soccode.soccodetype) references (occtypes.codetype)
2. Foreign Key (soccode.education) references (education.educat)
3. Foreign Key (soccode.experience) references (experience.expercat)
4. Foreign Key (soccode.training) references (training.trainingcat)
5. Foreign Key (soccode.socparent, soccode.socparentcodetyp) references (soccode.soccode, soccode.soccodetype)
6. Foreign Key (soccode.oohtnrm) references (oohtnrm.oohtnrm)

**Trigger Information**

Use triggers on INSERT, UPDATE or DELETE of soccode to maintain occcodes. (statelst.stfips, soccode.codetype, soccode.soccode, soccode.soctitle) maintains (occodes.stfips, occodes.codetype, occodes.code, occodes.codetitle)

**stattype**

A table of types of statistical measurement.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. stattype	char(2)	Primary Key	A code that represents the statistical type.
3. stattydesc	varchar(50)		A description of the statistical type of measurement.
<b>Constraint Information</b>			
1. Foreign Key (stattype.stfips) references (stfipstb.stfips)			

**stfipstb**

The table of State FIPS codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key	State FIPS code.
2. stname	varchar(20)		State name.
3. abbrev	char(2)		The two letter State abbreviation.

**stockexch**

A table of the stock exchange codes used in the empdb table.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stockexchcode	char(1)	Primary Key	Stock Exchange code.
2. stockexchdesc	varchar(40)		Description of the stock exchange code.

**stprogcd**

Revised in v2.8

A table for State-specific training program codes.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1, 2, 3	State FIPS Code
2. codetype	char(2)	Primary Key 2	A code describing the State classification code. NOTE that this should be set to '09', or issues could occur with the occcodes table.
3. code	char(10)	Primary Key 2	The classification code used by the state for this data element. This code could be DOT, OES, CIP, Cluster, SOC, Census, etc. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
4. title	varchar(200)		The program title represented by the code.
5. cipcode	char(10)	3	A 10-digit code assigned to a Classification of Instructional Programs (CIP) program title.
6. cipcodetype	char(2)	3	A code describing the version of the CIP code.
7. titledesc	varchar(MAX)		The program description.

**Constraint Information**

1. Foreign Key (stprogcd.stfips) references (stfipstb.stfips)
2. Foreign Key (stprogcd.stfips, stprogcd.codetype, stprogcd.code) references (occcodes.stfips, occcodes.codetype, occcodes.code)
3. Foreign Key (stprogcd.stfips, stprogcd.cipcodetype, stprogcd.cipcode) references (occcodes.stfips, occcodes.codetype, occcodes.code)

**Trigger Information**

Use triggers on INSERT, UPDATE or DELETE of stprogcd to maintain occcodes. (stprogcd.stfips, stprogcd.codetype, stprogcd.code, stprogcd.title) maintains (occcodes.stfips, occcodes.codetype, occcodes.code, occcodes.codetitle)

**subgeog**

A table of substate geographic areas and the larger areas that contain the areas.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. substfips	char(2)	Primary Key 2	A 2-digit code assigned to represent a substate FIPS code.
5. subareatype	char(2)	Primary Key 2	A 2-digit code assigned to represent the type of substate area.
6. subarea	char(6)	Primary Key 2	A 6-digit code assigned to represent the name of the substate area.

**Constraint Information**

1. Foreign Key (subgeog.stfips, subgeog.areatype, subgeog.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (subgeog.substfips, subgeog.subareatype, subgeog.subarea) references (geog.stfips, geog.areatype, geog.area)

**svc**

A table of military service branch codes.

Field Name	Type	Constraint	Description
1. svc	char(1)	Primary Key 1	Military service branch code.
2. svctitle	varchar(130)		Military service branch title.

**taxtype**

A table of the types of tax collected by a state.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code
2. taxtype	char(2)	Primary Key	A 2-digit code identifying the type of tax.
3. taxtypdesc	varchar(75)		A description of the tax.
<b>Constraint Information</b>			
1. Foreign Key (taxtype.stfips) references (stfipstb.stfips)			

**training**

A table of codes for the BLS training category for occupations.

Field Name	Type	Constraint	Description
1. trainingcat	char(1)	Primary Key	Code assigned to the on-the-job training category by BLS
2. trainingdesc	varchar(35)		Description of the on-the-job category

**unittype**

This table contains the building permit types, by state.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. unittype	char(2)	Primary Key	Code for the type of building permit.
3. typedesc	varchar(40)		Description of building permit.
<b>Constraint Information</b>			
1. Foreign Key (unittype.stfips) references (stfipstb.stfips)			

**urltopic**

**DEPRECATED in v2.6**

A table of uniform resource locator topic categories.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. urltopic	char(3)	Primary Key	Code for the type of uniform resource locator topic.
3. topicdesc	varchar(40)		Description of uniform resource locator topic.
<b>Constraint Information</b>			
1. Foreign Key (urltopic.stfips) references (stfipstb.stfips)			

**vetcode****DEPRECATED in v2.8**

A table of veteran type codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. veteran	char(1)	Primary Key 1	Code for veteran status of claimant.
2. vetdesc	varchar(60)		Description or title of veteran type.

**wgsource**

A table of wage data sources.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. wagesource	char(1)	Primary Key	A code representing the source of wage data.
3. wagesrdesc	varchar(60)		A description of the source of the wage data.
<b>Constraint Information</b>			
1. Foreign Key (wgsource.stfips) references (stfipstb.stfips)			

**worksite**

A table of worksite codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. worksite	char(1)	Primary Key	Code for status of worksite: open or closed.
2. wksitedesc	varchar(90)		Description or title of worksite.

## Data Tables

analysis				DEPRECATED in v2.8		
The analysis table contains one record for each state-defined cluster.						
Field Name	Type	Constraint	Description			
1. stfips	char(2)	Primary Key 1, 2, 3	State FIPS Code			
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area; e.g. county, service delivery area, MSA.			
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.			
4. periodyear	char(4)	Primary Key 4	Character representation of the calendar year (e.g. 2006).			
5. periodtype	char(2)	Primary Key 4	Code describing type of period (e.g. annual, quarterly, monthly, etc.)			
6. period	char(2)	Primary Key 4	Period Code. Will be set to 00 where periodtype is annual.			
7. cluscode	char(10)	Primary Key 2	Code assigned to the cluster from the State Units of Analysis.			
8. analysis	varchar(MAX)		A narrative analysis of the factors about the Supply/Demand situation for a state or substate area.			
9. clusgrade	char(1)	3	An evaluative rating for the cluster.			
10. placeclus	varchar(MAX)		Narrative statements about the placement rates for programs contained in the Unit of Analysis or Cluster.			
Constraint Information						
1. Foreign Key (analysis.stfips, analysis.areatype, analysis.area) references (geog.stfips, geog.areatype, geog.area) 2. Foreign Key (analysis.stfips, analysis.cluscode) references (cluscode.stfips, cluscode.cluscode) 3. Foreign Key (analysis.stfips, analysis.clusgrade) references (clusgrad.stfips, clusgrad.clusgrade) 4. Foreign Key (analysis.periodyear, analysis.periodtype, analysis.period) references (period.periodyear, period.periodtype, period.period)						

**bed**

Table of private sector business employment dynamics data, showing job losses and gains due to expansion, contraction, new and closed business.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.
7. indcodetype	char(2)	Primary Key 3	Code for the type of industry: 05 = SIC; 10 = NAICS
8. indcode	char(6)	Primary Key 3	The industry code.
9. adjusted	char(1)	Primary Key	Indicates whether data is seasonally adjusted: 0 = Not Adjusted; 1 = Adjusted
10. bedtypcode	char(1)	Primary Key 4	Indicator of the type of data.
11. bedemploy	numeric(12)		Amount of employment gain/loss
12. bedempperc	numeric(4,1)		Percent employment gain/loss
13. bedestabs	numeric(12)		Number of establishments involved in gain/loss
14. bedestperc	numeric(4,1)		Percent establishments involved in gain/loss
15. suppress	char(1)		An indicator that the record contains confidential data that must be suppressed for public use: 0 = Not Suppressed; 1 = Suppressed

**Constraint Information**

1. Foreign Key (bed.stfips, bed.areatype, bed.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (bed.periodyear, bed.periodtype, bed.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (bed.stfips, bed.indcodetype, bed.indcode) references (indcodes.stfips, indcodes.codetype, indcodes.code)
4. Foreign Key (bed.bedtypcode) references (bedtypes.bedtypcode)

**blding**

Table of building permits awarded per area and time period.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfps	char(2)	Primary Key 1, 3	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
7. unittype	char(2)	Primary Key 3	Code for the type of building permit.
8. units	numeric(7)		Number of building permits.
9. unitcost	numeric(12)		Building construction cost.

**Constraint Information**

1. Foreign Key (blding.stfps, blding.areatype, blding.area) references (geog.stfps, geog.areatype, geog.area)
2. Foreign Key (blding.periodyear, blding.periodtype, blding.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (blding.stfps, blding.unittype) references (unittype.stfps, unittype.unittype)

**cenlabor****DEPRECATED in v2.8**

Table of the labor force by the current Census occupation code, and gender.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfps	char(2)	Primary Key 1, 3	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.
7. censcode	char(10)	Primary Key 3	A 4-digit code assigned to the Census occupational title.
8. codetype	char(2)	Primary Key 3	Code describing the Census occupation code.
9. femalelf	numeric(8)		Number of females in the occupation in the labor force.
10. malelf	numeric(8)		Number of males in the occupation in the labor force.

**Constraint Information**

1. Foreign Key (cenlabor.stfps, cenlabor.areatype, cenlabor.area) references (geog.stfps, geog.areatype, geog.area)
2. Foreign Key (cenlabor.periodyear, cenlabor.periodtype, cenlabor.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (cenlabor.stfps, cenlabor.codetype, cenlabor.censcode) references (occcodes.stfps, occcodes.codetype, occcodes.code)

ces				
Employment estimates as reported by the CES.				
Field Name	Type	Constraint	Description	
1. stfips	char(2)	Primary Key 1, 3	State FIPS Code	
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.	
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.	
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).	
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)	
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.	
7. seriescode	char(8)	Primary Key 3	Industrial Series code.	
8. adjusted	char(1)	Primary Key	Indicates if record contains seasonally adjusted data. 1 = adjusted; 0 = not adjusted	
9. benchmark	char(4)	4	Benchmark year of the data.	
10. prelim	char(1)		Preliminary/revised flag. 0 = Not Preliminary; 1 = Preliminary	
11. empces	numeric(9)		Number employed by place of work; actual number, not in thousands.	
12. empprodwrk	numeric(9)		Number of Production workers;	
13. empfemale	numeric(9)		Number of females employed; actual number, not in thousands.	
14. hours	numeric(3,1)		Average hours worked per week.	
15. earnings	numeric(8,2)		Average weekly earnings.	
16. hourearn	numeric(6,2)		Average hourly earnings.	
17. supprecord	char(1)		Suppress total record. 1 = Suppressed; 0 = Not Suppressed	
18. supphe	char(1)		Suppress hours and earnings.	
19. suppw	char(1)		Suppress Production Workers.	
20. suppem	char(1)		Suppress Female Employment.	
21. hoursallwrkr	numeric(3,1)		Average hours worked per week for all workers.	
22. earningsallwrkr	numeric(8,2)		Average weekly earnings for all workers.	
23. hourearnallwrkr	numeric(6,2)		Average hourly earnings for all workers.	
24. suppheallwrkr	char(1)		Suppress hours and earnings for all workers: 0 = not suppressed; 1 = suppressed	
Constraint Information				
1. Foreign Key (ces.stfips, ces.areatype, ces.area) references (geog.stfips, geog.areatype, geog.area) 2. Foreign Key (ces.periodyear, ces.periodtype, ces.period) references (period.periodyear, period.periodtype, period.period) 3. Foreign Key (ces.stfips, ces.seriescode) references (cescode.stfips, cescode.seriescode) 4. Foreign Key (ces.benchmark) references (benchmark.benchmark)				

**commute**

Commuting patterns, by and to geographic areas.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.
7. wkstfips	char(2)	Primary Key 3	State FIPS Code of workplace.
8. wkareaty	char(2)	Primary Key 3	Area type code for workplace.
9. wkarea	char(6)	Primary Key 3	Area code for workplace.
10. workers	numeric(8)		Number of workers.

<b>Constraint Information</b>			
1. Foreign Key (commute.stfips, commute.areatype, commute.area) references (geog.stfips, geog.areatype, geog.area)			
2. Foreign Key (commute.periodyear, commute.periodtype, commute.period) references (period.periodyear, period.periodtype, period.period)			
3. Foreign Key (commute.wkstfips, commute.wkareaty, commute.wkarea) references (geog.stfips, geog.areatype, geog.area)			

**cpi**

Table of Consumer Price Indices.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3, 4	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.
7. cpitype	char(2)	Primary Key 3	Type of CPI measure.
8. cpisource	char(1)	Primary Key 4	Source of the CPI measure.
9. cpi	numeric(8,3)		CPI measure.
10. pctchgy	numeric(6,1)		The percent change in the CPI from the period exactly one year ago to the current period.
11. pctchgm	numeric(6,1)		The percent change in the CPI from the period exactly one month ago to the current month.
<b>Constraint Information</b>			
1. Foreign Key (cpi.stfips, cpi.areatype, cpi.area) references (geog.stfips, geog.areatype, geog.area)			
2. Foreign Key (cpi.periodyear, cpi.periodtype, cpi.period) references (period.periodyear, period.periodtype, period.period)			
3. Foreign Key (cpi.stfips, cpi.cpitype) references (cpitype.stfips, cpitype.cpitype)			
4. Foreign Key (cpi.stfips, cpi.cpisource) references (cpisource.stfips, cpisource.cpisource)			

**cpiplus**

Enhanced CPI content with more indices and geographies available.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 4	State FIPS code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: set to '31' for BLS CPI Geographic Area
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006)
5. periodtype	char(2)	Primary Key 2	Code describing the type of period (e.g., annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period code. Will be set to '00' when periodtype is annual.
7. adjusted	char(1)	Primary Key	Indicates whether record contains seasonally adjusted data: 0 = not adjusted; 1 = adjusted
8. cpiindex	char(1)	Primary Key	Indicates the index represented: U = All urban consumers; W = Urban wage earners and clerical workers
9. cpiitem	char(9)	Primary Key 3	Code that identifies market basket items included in the index
10. cpisource	char(1)	Primary Key 4	Source of the CPI measure
11. basis	char(4)		The 4-digit representation of the terminal year of the base period for the index (Current value is '1984' since the index uses 1982-84 as its base period)
12. cpi	number(8,3)		CPI measure
13. pctchangey	numeric(6,1)		The percent change in the CPI from the period exactly one year ago to the current period
14. pctchangem	numeric(6,1)		The percent change in the CPI from the period exactly one month ago to the current period

**Constraint Information**

1. Foreign Key (cpiplus.stfips, cpiplus.areatype, cpiplus.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (cpiplus.periodyear, cpiplus.periodtype, cpiplus.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (cpiplus.cpiitem) references (itemcpi.cpiitem)
4. Foreign Key (cpiplus.stfips, cpiplus.cpisource) references (cpisource.stfips, cpisource.cpisource)

**demographics**

Revised in v2.8

Table of population estimates and demographic characteristics by geographic area and time period.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1, 3	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	Six-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
7. popsource	char(1)	Primary Key 3	Source Code for population data.
8. population	number(9)		Number representing the population total for the specified geographic area and time period.
9. female	number(9)		Total female population
10. male	number(9)		Total male population
11. median	number(4,1)		Population median age
12. medianmale	number(4,1)		Male population median age
13. medianfem	number(4,1)		Female population median age
14. totunder5	number(9)		Total population age under 5
15. femunder5	number(9)		Female population age under 5
16. maleunder5	number(9)		Female population age under 5
17. tot5to9	number(9)		Total population age 5-9
18. fem5to9	number(9)		Female population age 5-9
19. male5to9	number(9)		Male population age 5-9
20. tot10to14	number(9)		Total population age 10-14
21. fem10to14	number(9)		Female population age 10-14
22. male10to14	number(9)		Female population age 10-14
23. tot15to19	number(9)		Total population age 15-19
24. fem15to19	number(9)		Female population age 15-19
25. male15to19	number(9)		Male population age 15-19
26. tot15to17	number(9)		Total population age 15-17
27. fem15to17	number(9)		Female population age 15-17
28. male15to17	number(9)		Male population age 15-17
29. tot18to19	number(9)		Total population age 18-19
30. fem18to19	number(9)		Female population age 18-19
31. male18to19	number(9)		Male population age 18-19
32. tot20to24	number(9)		Total population age 20-24
33. fem20to24	number(9)		Female population age 20-24
34. male20to24	number(9)		Male population age 20-24
35. tot20	number(9)		Total population age 20
36. fem20	number(9)		Female population age 20
37. male20	number(9)		Male population age 20
38. tot21	number(9)		Total population age 21
39. fem21	number(9)		Female population age 21

**demographics**

Revised in v2.8

Table of population estimates and demographic characteristics by geographic area and time period.

Field Name	Type	Constraint	Description
40. male21	number(9)		Male population age 21
41. tot22to24	number(9)		Total population age 22-24
42. fem22to24	number(9)		Female population age 22-24
43. male22to24	number(9)		Male population age 22-24
44. tot25to34	number(9)		Total population age 25-34
45. fem25to34	number(9)		Female population age 25-34
46. male25to34	number(9)		Male population age 25-34
47. tot25to29	number(9)		Total population age 25-29
48. fem25to29	number(9)		Female population age 25-29
49. male25to29	number(9)		Male population age 25-29
50. tot30to34	number(9)		Total population age 29-34
51. fem30to34	number(9)		Female population age 29-34
52. male30to34	number(9)		Male population age 29-34
53. tot35to44	number(9)		Total population age 35-44
54. fem35to44	number(9)		Female population age 35-44
55. male35to44	number(9)		Male population age 35-44
56. tot35to39	number(9)		Total population age 35-39
57. fem35to39	number(9)		Female population age 35-39
58. male35to39	number(9)		Male population age 35-39
59. tot40to44	number(9)		Total population age 40-44
60. fem40to44	number(9)		Female population age 40-44
61. male40to44	number(9)		Male population age 40-44
62. tot45to54	number(9)		Total population age 45-54
63. fem45to54	number(9)		Female population age 45-54
64. male45to54	number(9)		Male population age 45-54
65. tot45to49	number(9)		Total population age 45-49
66. fem45to49	number(9)		Female population age 45-49
67. male45to49	number(9)		Male population age 45-49
68. tot50to54	number(9)		Total population age 50-54
69. fem50to54	number(9)		Female population age 50-54
70. male50to54	number(9)		Male population age 50-54
71. tot55to59	number(9)		Total population age 55-59
72. fem55to59	number(9)		Female population age 55-59
73. male55to59	number(9)		Male population age 55-59
74. tot60to64	number(9)		Total population age 60-64
75. fem60to64	number(9)		Female population age 60-64
76. male60to64	number(9)		Male population age 60-64
77. tot60to61	number(9)		Total population age 60-61
78. fem60to61	number(9)		Female population age 60-61
79. male60to61	number(9)		Male population age 60-61
80. tot62to64	number(9)		Total population age 62-64
81. fem62to64	number(9)		Female population age 62-64
82. male62to64	number(9)		Male population age 62-64

**demographics**

Revised in v2.8

Table of population estimates and demographic characteristics by geographic area and time period.

Field Name	Type	Constraint	Description
83. tot65to69	number(9)		Total population age 65-74
84. fem65to69	number(9)		Female population age 65-74
85. male65to69	number(9)		Male population age 65-74
86. tot65to66	number(9)		Total population age 65-66
87. fem65to66	number(9)		Female population age 65-66
88. male65to66	number(9)		Male population age 65-66
89. tot67to69	number(9)		Total population age 67-69
90. fem67to69	number(9)		Female population age 67-69
91. male67to69	number(9)		Male population age 67-69
92. tot70to74	number(9)		Total population age 70-74
93. fem70to74	number(9)		Female population age 70-74
94. male70to74	number(9)		Male population age 70-74
95. tot75to84	number(9)		Total population age 75-84
96. fem75to84	number(9)		Female population age 75-84
97. male75to84	number(9)		Male population age 75-84
98. tot75to79	number(9)		Total population age 75-79
99. fem75to79	number(9)		Female population age 75-79
100. male75to79	number(9)		Male population age 75-79
101. tot80to84	number(9)		Total population age 80-84
102. fem80to84	number(9)		Female population age 80-84
103. male80to84	number(9)		Male population age 80-84
104. tot85xx	number(9)		Total population age 85 and over
105. fem85xx	number(9)		Female population age 85 and over
106. male85xx	number(9)		Male population age 85 and over
107. tot18xx	number(9)		Total population age 18 and over
108. fem18xx	number(9)		Female population age 18 and over
109. male18xx	number(9)		Male population age 18 and over
110. tot21xx	number(9)		Total population age 21 and over
111. fem21xx	number(9)		Female population age 21 and over
112. male21xx	number(9)		Male population age 21 and over
113. tot62xx	number(9)		Total population age 62 and over
114. fem62xx	number(9)		Female population age 62 and over
115. male62xx	number(9)		Male population age 62 and over
116. onerace	number(9)		Population: one race
117. white	number(9)		One race: White
118. black	number(9)		One race: Black or African American
119. naan	number(9)		One race: American Indian or Alaskan Native
120. asian	number(9)		One race: Asian
121. pacisland	number(9)		One race: Native Hawaiian and Other Pacific Islander
122. other	number(9)		One race: Other
123. twomoraces	number(9)		Two or more races
124. hispanic	number(9)		Hispanic or Latino
125. hispwhite	number(9)		Hispanic or Latino: White Alone

**demographics**

Revised in v2.8

Table of population estimates and demographic characteristics by geographic area and time period.

Field Name	Type	Constraint	Description
126. hispblack	number(9)		Hispanic or Latino: Black or African American
127. hispnnaan	number(9)		Hispanic or Latino: American Indian or Alaskan Native
128. hispasian	number(9)		Hispanic or Latino: Asian
129. hisppacisl	number(9)		Hispanic or Latino: Hawaiian and Other Pacific Islander
130. hispother	number(9)		Hispanic or Latino: Some other race alone
131. hisp2race	number(9)		Hispanic or Latino: Two or more races

**Constraint Information**

1. Foreign Key (demographics.stfips, demographics.areatype, demographics.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (demographics.periodyear, demographics.periodtype, demographics.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (demographics.stfips, demographics.popsource) references (popsource.stfips, popsource.popsource)

**Table Notes**

- 1: For multi-year estimates, periodyear should be set to the terminal year, eg. 2008 for 2006-2008 estimates.

**develop****DEPRECATED in v2.8**

Table of industrial development.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.
7. indcdty	char(2)	Primary Key 3	Code describing the industry code type.
8. indcode	char(6)	Primary Key 3	A code used in the classification of establishments by type of activity in which they are engaged. For codes not 6 characters long, left justify and blank (ASCII 32) fill. Either SIC or NAICS code can be used.
9. newinvest	numeric(10)		New industry investment data.
10. newemply	numeric(7)		New industry employment data.
11. newfirms	numeric(6)		Number of new firms.
12. expinvest	numeric(10)		Expanded industry investment data.
13. expemply	numeric(7)		Expanded industry employment data.
14. expfirms	numeric(6)		Number of expanding firms.
15. invincent	numeric(10)		Infrastructure investment.

**Constraint Information**

1. Foreign Key (develop.stfips, develop.areatype, develop.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (develop.periodyear, develop.periodtype, develop.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (develop.stfips, develop.indcdty, develop.indcode) references (indcode.stfips, indcode.codetyp, indcode.code)

**eeolabfac****DEPRECATED in v2.6**

Labor Force, Employment, and Unemployment factors by race and gender, derived from Summary File 3A, tables 043 and 150 (a through i).

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.
7. gender	char(1)	Primary Key 3	Gender Code.
8. raceethn	char(5)	Primary Key 4	The Workforce Information Race/Ethnicity code.
9. lffact	numeric(9,8)		The EEO Race/Gender combination divided by the total 2000 Census labor force.
10. empfact	numeric(9,8)		The EEO Race/Gender combination divided by the total 2000 Census employment
11. unempfact	numeric(9,8)		The EEO Race/Gender combination divided by the total 2000 Census unemployment.

**Constraint Information**

1. Foreign Key (eeolabfac.stfips, eeolabfac.areatype, eeolabfac.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (eeolabfac.periodyear, eeolabfac.periodtype, eeolabfac.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (eeolabfac.gender) references (gender.gender)
4. Foreign Key (eeolabfac.raceethn) references (raceethn.raceethn)

<b>eeolabfor</b>				<b>DEPRECATED in v2.6</b>
Employment and unemployment estimates reported from the Local Area Unemployment Statistics broken down by Census EEO Categories.				
Field Name	Type	Constraint	Description	
1. stfips	char(2)	Primary Key 1	State FIPS Code	
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.	
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.	
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).	
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)	
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.	
7. gender	char(1)	Primary Key 3	Gender Code.	
8. raceethn	char(5)	Primary Key 4	The Workforce Information Race/Ethnicity code.	
9. laborforce	numeric(9)		Civilian labor force.	
10. emplab	numeric(9)		Number employed by place of residence.	
11. unemp	numeric(9)		Number unemployed.	
12. unemprate	numeric(5,1)		Unemployment rate.	
<b>Constraint Information</b>				
1. Foreign Key (eeolabfor.stfips, eeolabfor.areatype, eeolabfor.area) references (geog.stfips, geog.areatype, geog.area)				
2. Foreign Key (eeolabfor.periodyear, eeolabfor.periodtype, eeolabfor.period) references (period.periodyear, period.periodtype, period.period)				
3. Foreign Key (eeolabfor.gender) references (gender.gender)				
4. Foreign Key (eeolabfor.raceethn) references (raceethn.raceethn)				

**eeoocc****DEPRECATED in v2.6**

Table of 2000 EEO Census occupation data, by race/ethnicity.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 5	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.
7. gender	char(1)	Primary Key 3	Gender Code.
8. raceethn	char(5)	Primary Key 4	The Workforce Information Race/Ethnicity code.
9. occodetype	char(2)	Primary Key 5	Code describing the type of occupational coding system. This will be '06' for census code.
10. occcode	char(10)	Primary Key 5	The occupational classification code used by the state for this data element. In most cases, this will be the CENSUS code. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
11. explabfor	numeric(10)		The experienced labor force for the occupation (those with work experience in the occupation, 1995-2000).

**Constraint Information**

1. Foreign Key (eeoocc.stfips, eeoocc.areatype, eeoocc.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (eeoocc.periodyear, eeoocc.periodtype, eeoocc.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (eeoocc.gender) references (gender.gender)
4. Foreign Key (eeoocc.raceethn) references (raceethn.raceethn)
5. Foreign Key (eeoocc.stfips, eeoocc.occodetype, eeoocc.occcode) references (occcodes.stfips, occcodes.codetype, occcodes.code)

**eeopop****DEPRECATED in v2.6**

Table of Equal Employment Opportunity (EEO) state and local populations.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.
7. gender	char(1)	Primary Key 3	Gender Code.
8. raceethn	char(5)	Primary Key 4	The Workforce Information Race/Ethnicity code.
9. population	numeric(10)		Number representing the population total for the specified geographic area and time period.

**Constraint Information**

1. Foreign Key (eeopop.stfips, eeopop.areatype, eeopop.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (eeopop.periodyear, eeopop.periodtype, eeopop.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (eeopop.gender) references (gender.gender)
4. Foreign Key (eeopop.raceethn) references (raceethn.raceethn)

**empdb**

The Employer Database, used for data on individual companies, subject to license agreements between States and the vendor.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	1	State FIPS code of employer's physical location.
2. areatype	char(2)	1	Always township code '14' for New England states; always county code '04' for all other states.
3. area	char(6)	1	A 3-digit code assigned to county (fips) or township where business is located, front filled with zeroes.
4. uniqueid	char(9)	Primary Key	Employer's unique id assigned by InfoGroup.
5. fein	char(9)		Federal Employer Identification Number
6. lastupdate	char(6)		Date of record's most recent update or verification from Yellow Page compilation or other sources.
7. name	varchar(35)		Name by which the business is known or under which it conducts business.
8. addressP	varchar(40)		Employer's physical location - street address
9. cityP	varchar(30)		Employer's physical location - city
10. stateP	char(2)		Employer's physical location - state
11. zipcodeP	char(5)		Employer's physical location - zip code
12. zipplusP	char(4)		Employer's physical location - zip + 4
13. latitude	numeric(11,6)		Employer's physical location - latitude
14. longitude	numeric(11,6)		Employer's physical location - longitude
15. geocode	char(1)	2	Employer's physical location - geocode precision level code. The precision of the longitude and latitude coordinates.
16. censustract	char(6)		Census tract - A statistical subdivision of a county
17. censusblockgrp	char(1)		Census block group - a combination of census blocks within a census tract.
18. addressM	varchar(40)		Employer's mailing address - street address
19. cityM	varchar(30)		Employer's mailing address - city
20. stateM	char(2)		Employer's mailing address - state
21. zipcodeM	char(5)		Employer's mailing address - zip-code
22. zipplusM	char(4)		Employer's mailing address - zip + 4
23. addressL	varchar(40)		Employer's landmark address - landmark
24. cityL	varchar(30)		Employer's landmark address - city
25. stateL	char(2)		Employer's landmark address - state
26. zipcodeL	char(5)		Employer's landmark address - zip-code
27. zipplusL	char(4)		Employer's landmark address - zip + 4
28. telenum	char(10)		Employer's telephone number with area code.
29. cntctlname	varchar(30)		Contact's last name.
30. cntctfname	varchar(30)		Contact's first name.
31. cntcttitle	varchar(35)		Contact's title(e.g., HR director, owner, president)
32. contacttitlecode	char(1)	3	Contact's title code
33. contactprotile	char(3)	4	Contact's professional title
34. contactgender	char(1)		Contact's gender code
35. contactemail	varchar(60)		Contact's email address
36. tollfreetele	char(10)		Employer's toll-free telephone number
37. faxnumber	char(10)		Employer's fax number.
38. weburl	varchar(40)		Employer's web site address (URL).

**empdb**

The Employer Database, used for data on individual companies, subject to license agreements between States and the vendor.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
39. busdesc	varchar(45)		Business description(a one-line 'line of business' identifier).
40. primarysic	char(6)		Employer's primary SIC code.
41. sic2	char(6)		Employer's SIC code #2
42. sic3	char(6)		Employer's SIC code #3
43. sic4	char(6)		Employer's SIC code #4
44. sic5	char(6)		Employer's SIC code #5
45. primnaics	char(8)		Employer's primary NAICS code.
46. naics2	char(8)		Employer's NAICS code #2
47. naics3	char(8)		Employer's NAICS code #3
48. naics4	char(8)		Employer's NAICS code #4
49. naics5	char(8)		Employer's NAICS code #5
50. privgovsta	char(1)	5	Identifies whether the business is a government or private sector entity.
51. locstat	char(1)	6	Identifies the business location status.
52. stockexchcode	char(1)	7	Stock exchange code identifies the Stock Exchange where the business conducts trading activity.
53. stockticker	char(6)		Stock "TICKER" symbol is shown for companies that are traded on any public stock exchange or listed in the NASDAQ "over the counter" quotation system or other small exchanges (i.e., Chicago Mercantile).
54. whitecollarpct	numeric(4,1)		Percentage of white collar employment
55. whitecollarind	char(1)		White collar indicator: 1 = Over 50% white collar employment
56. empsizrng	char(2)	8	Code for the number of employees that work at this business location, by range.
57. empsizval	numeric(9)		Number of employees who work at this location of the business.
58. empsizflg	char(1)	9	Code identifying how the employment (empsizval) was derived.
59. annsalrng	char(2)	10	Code for the estimated sales of the business at this location, in thousands, by range.
60. annsalval	varchar(15)		Estimated annual sales volume of the business at this location.
61. annsalflg	char(1)	11	Code identifying how the annual sales volume was derived.
62. yearest	char(4)		Year the business at this location was established or identified and added to the database.
63. creditcd	char(1)	12	Credit rating code: an indicator of a business' financial status, or probable ability to pay. These are modeled; they do not reflect actual payment history. Users must be cautioned that these credit rating indicators should not be the sole factor in making a credit decision.
64. hdqtrsld	char(9)		The uniqueid of the regional or subsidiary headquarters of the business to which this record pertains.
65. parentid	char(9)		The uniqueid of the corporate parent of the business to which this record pertains. This may be the immediate or a higher level U.S. corporate parent of the business.
66. ultimateparentid	char(9)		The uniqueid of the ultimate corporate parent to which this record pertains. This may be a higher level U.S. or foreign corporate parent of the business. Since all locations of a business have the same ultimate parent number, this field provides 'corporate ownership' linkage information.
67. foreignparentind	char(1)		Foreign parent indicator. A '1' = foreign affiliation.

**empdb**

The Employer Database, used for data on individual companies, subject to license agreements between States and the vendor.

Field Name	Type	Constraint	Description
68. exportimportind	char(1)		Export Import indicator code Indicates the type of services provided.
69. businesstype	char(1)		Code helps identify if the record represents a professional individual versus a firm.
70. workathome	char(1)		Work-at-home business. A '1' indicates a home business.
71. releaseno	char(3)	13	empdb release number

**Constraint Information**

1. Foreign Key (empdb.stfips, empdb.areatype, empdb.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (empdb.geocode) references (geocode.geocode)
3. Foreign Key (empdb.contacttitlecode) references (contacttitle.contacttitlecode)
4. Foreign Key (empdb.contactprotile) references (contactpro.contactprotile)
5. Foreign Key (empdb.privgovsta) references (prvgovst.privgovsta)
6. Foreign Key (empdb.locstat) references (locstat.locstat)
7. Foreign Key (empdb.stockexchcode) references (stockexch.stockexchcode)
8. Foreign Key (empdb.empsizrng) references (empszrng.empsizrng)
9. Foreign Key (empdb.empsizflg) references (empszflg.empsizflg)
10. Foreign Key (empdb.annsalrng) references (annsalrng.annsalrang)
11. Foreign Key (empdb.annsalflg) references (annsalflg.annsalflg)
12. Foreign Key (empdb.creditcd) references (creditcd.creditcd)
13. Foreign Key (empdb.releaseno) references (empdbinf.releaseno)

**esapplic1****DEPRECATED in v2.8**

Employment Service applicant characteristics.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 6, 7	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
7. occodetype	char(2)	Primary Key 7	Code describing the occupational code.
8. occcode	char(10)	Primary Key 7	The occupational classification code used by the state for this data element. This code could be DOT, OES, SOC, Census, etc. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
9. agegroup	char(2)	Primary Key 3	Code representing age group.
10. gender	char(1)	Primary Key 4	Gender code.
11. raceethn	char(5)	Primary Key 5	Code indicating ethnicity and race of claimants.
12. highestgrd	char(2)	Primary Key 6	Code indicating the highest school grade completed.
13. esapplicid	int		Unique ID for relating esapplic2 to esapplic1.
14. applicants	numeric(8)		Number of current applicants.

**Constraint Information**

1. Foreign Key (esapplic1.stfips, esapplic1.areatype, esapplic1.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (esapplic1.periodyear, esapplic1.periodtype, esapplic1.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (esapplic1.stfips, esapplic1.agegroup) references (agegroup.stfips, agegroup.agegroup)
4. Foreign Key (esapplic1.gender) references (gender.gender)
5. Foreign Key (esapplic1.raceethn) references (raceethn.raceethn)
6. Foreign Key (esapplic1.stfips, esapplic1.highestgrd) references (schgrade.stfips, schgrade.highestgrd)
7. Foreign Key (esapplic1.stfips, esapplic1.occodetype, esapplic1.occcode) references (occcodes.stfips, occcodes.codetype, occcodes.code)

**Table Notes**

- 1: Unique constraint: combination of stfips and esapplicid cannot be duplicated.

<b>esapplic2</b>				<b>DEPRECATED in v2.8</b>
Employment Service applicant characteristics.				
<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>	
1. stfips	char(2)	Primary Key 1	State FIPS code.	
2. esapplicid	int	Primary Key 1	Unique ID for relating esapplic2 to esapplic1.	
3. veteran	char(1)	Primary Key 2	Code representing veteran status.	
4. disabled	char(1)	Primary Key 3	Code indicating handicapped applicants.	
5. seasonal	char(1)	Primary Key 4	Code indicating seasonal or migrant workers.	
6. econdisadv	char(1)	Primary Key 5	Code indicating those who are economically disadvantaged.	
7. dislocated	char(1)	Primary Key 6	Code indicating dislocated workers.	
8. applicants	numeric(8)		Number of current applicants.	

<b>Constraint Information</b>
1. Foreign Key (esapplic2.stfips, esapplic2.esapplicid) references (esapplic1.stfips, esapplic1.esapplicid)
2. Foreign Key (esapplic2.veteran) references (vetcode.veteran)
3. Foreign Key (esapplic2.disabled) references (disabil.disabled)
4. Foreign Key (esapplic2.seasonal) references (seasonal.seasonal)
5. Foreign Key (esapplic2.econdisadv) references (disadvan.econdisadv)
6. Foreign Key (esapplic2.dislocated) references (dislocat.dislocated)

<b>esdata</b>			
Employment Service Data.			
<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 4, 5	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.
7. occodetype	char(2)	Primary Key 5	Code describing the occupational code.
8. occcode	char(10)	Primary Key 5	The classification occupational code used by the state for this data element. This code could be DOT, OES, SOC, CENSUS, etc. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
9. stattype	char(2)	Primary Key 4	Code that represents the statistical type for eswage.
10. ratetype	char(1)	Primary Key 3	Code describing units for eswage.
11. eswage	numeric(9,2)		A statistical measure of wage offered for the openings in a job classification (e.g., median wage, average wage for the job classification).
12. esorders	numeric(8)		Employment Service job orders.
13. esopen	numeric(8)		Employment Service job openings.
14. esapps	numeric(8)		Employment Service job applicants.
15. newapps	numeric(8)		Number of new Employment Service job applicants.
16. referrals	numeric(8)		Number of job seekers referred to jobs.

<b>Constraint Information</b>			
1. Foreign Key (esdata.stfips, esdata.areatype, esdata.area) references (geog.stfips, geog.areatype, geog.area) 2. Foreign Key (esdata.periodyear, esdata.periodtype, esdata.period) references (period.periodyear, period.periodtype, period.period) 3. Foreign Key (esdata.ratetype) references (ratetype.ratetype) 4. Foreign Key (esdata.stfips, esdata.stattype) references (stattype.stfips, stattype.stattype) 5. Foreign Key (esdata.stfips, esdata.occodetype, esdata.occcode) references (occcodes.stfips, occcodes.codetype, occcodes.code)			

<b>income</b>				Revised in v2.8
<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>	
1. stfips	char(2)	Primary Key 1, 3, 4	State FIPS Code	
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.	
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.	
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).	
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)	
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.	
7. inctype	char(2)	Primary Key 3	Code describing type of income measure.	
8. incsource	char(1)	Primary Key 4	Source of the income measure.	
9. income	numeric(14)		Value of income measure.	
10. incrank	numeric(3)		Rank of income measure.	
11. population	numeric(10)		Population of the geography referenced. (Related to inctype e.g., number of households, number of families, number persons.)	
12. releasedate	char(8)		Release Date (yyyymmdd)	

**Constraint Information**

1. Foreign Key (income.stfips, income.areatype, income.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (income.periodyear, income.periodtype, income.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (income.stfips, income.inctype) references (incomtyp.stfips, incomtyp.inctype)
4. Foreign Key (income.stfips, income.incsource) references (incsource.stfips, incsource.incsource)

**indprj****DEPRECATED in v2.6**

Table of employment projections by industries and areas.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodid	char(2)	Primary Key 2	A 2-digit code identifying the base and projected periods.
5. matincode	char(15)	Primary Key 2	Matrix industry code from Micro Matrix.
6. estindprj	numeric(9)	2	A numerical value representing a base year employment estimate for an industry.
7. projindprj	numeric(9)		A value representing the projected year employment estimate for an industry.
8. grrate	numeric(7,4)		A value representing the annualized percentage growth. This value is calculated by dividing the Projected year by the Base year. Taking the results to the 1/n power, where n is the number of years in the projection period, subtracting 1 from the result and multiplying that result by 100. $100 \cdot grrate = (((projindprj/estindprj)^{1/n}) - 1) * 100$
9. nchg	numeric(9)		Numeric Change between the projected estimate and the base estimate.
10. pchg	numeric(7,4)		Percent change over period((projindprj-estindprj)/estindprj)*100
11. growcode	char(2)	3	A descriptor to allow for state specific interpretation of the industry or occupation.
12. suppress	char(1)		An indicator that the record contains confidential data that must be suppressed for public use: 0 = Not Suppressed; 1 = Suppressed

**Constraint Information**

1. Foreign Key (indprj.stfips, indprj.areatype, indprj.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (indprj.stfips, indprj.matincode, indprj.periodid) references (inddir.stfips, inddir.matincode, inddir.periodid)
3. Foreign Key (indprj.stfips, indprj.growcode) references (growcode.stfips, growcode.growcode)

**industry**

Table of covered employment by industry collected for the ES-202/QCEW report.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3, 4	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.
7. indcdty	char(2)	Primary Key 4	Code describing the industry code type.
8. indcode	char(6)	Primary Key 4	A code used in the classification of establishments by type of activity in which they are engaged. For codes not 6 characters long, left justify and blank (ASCII 32) fill. Either SIC or NAICS code can be used.
9. ownership	char(2)	Primary Key 3	Ownership is a 2-digit indicator that identifies the employer by public or private ownership.
10. prelim	char(1)		Preliminary/revised flag: 0 = Not Preliminary; 1 = Preliminary
11. firms	numeric(8)		The number of firms in the industry.
12. estab	numeric(8)		The number of employer establishments (reporting units) in the industry.
13. avgemp	numeric(9)		The number of workers employed in the industry.
14. mnth1emp	numeric(9)		Employment on the first month of the quarter.
15. mnth2emp	numeric(9)		Employment on the second month of the quarter.
16. mnth3emp	numeric(9)		Employment on the third month of the quarter.
17. topempav	numeric(9)		Average employment for the quarter or year of the top employer for the specified geography and industry code.
18. totwage	numeric(14)		The total wages paid to all workers in the industry for the period.
19. avgwk wage	numeric(8)		Average weekly wage per worker.
20. taxwage	numeric(14)		Total taxable wages.
21. contrib	numeric(12)		Employer contributions to the UI fund.
22. suppress	char(1)		An indicator that the record contains confidential data that must be suppressed for public use: 0 = Not Suppressed; 1 = Suppress employment & wage data

**Constraint Information**

1. Foreign Key (industry.stfips, industry.areatype, industry.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (industry.periodyear, industry.periodtype, industry.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (industry.stfips, industry.ownership) references (ownership.stfips, ownership.ownership)
4. Foreign Key (industry.stfips, industry.indcdty, industry.indcode) references (indcodes.stfips, indcodes.codetype, indcodes.code)

## iomatrix

Table of the industry-occupation employment matrix.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1, 2, 3, 4	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodid	char(2)	Primary Key 2, 3	A 2-digit code identifying the type of period used.
5. matincode	char(15)	Primary Key 2	Matrix industry code from Micro Matrix.
6. matoccode	char(10)	Primary Key 3	Matrix occupation code from Micro Matrix. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
7. estemp	numeric(9)		The base-year employment estimate.
8. projemp	numeric(9)		The projected-year employment estimate.
9. pctestind	numeric(6,2)		The percentage of the base-year employment estimate for the indicated industry represented by the base-year employment estimate for the indicated occupation within that industry.
10. pctestocc	numeric(6,2)		The percentage of the base-year employment estimate for the indicated occupation represented by the base-year employment estimate for the indicated industry within that occupation.
11. pctprojind	numeric(6,2)		The percentage of projected employment for the indicated industry represented by projected employment for the indicated occupation within that industry.
12. pctprojocc	numeric(6,2)		The percentage of the projected employment estimate for the indicated occupation represented by the projected employment estimate for the indicated industry within that occupation.
13. nchg	numeric(9)		Numeric Change between the projected estimate and the base estimate.
14. pchg	numeric(9,4)		Percent change over period.((projemp-estemp)/estemp)*100
15. growrate	numeric(7,4)		A value representing the annualized percentage growth. This value is calculated by dividing the Projected year by the Base year. Taking the results to the 1/n power, where n is the number of years in the projection period, subtracting 1 from the result and multiplying that result by 100. Ie. $grrate = (((projemp/estemp)^{1/n}) - 1) * 100$
16. growcode	char(2)	4	A descriptor to allow for state specific interpretation of the industry or occupation.
17. aopeng	numeric(9)		A value representing the annual average openings due to growth. The value is calculated by subtracting the Base Year Employment estimate from the Projected Year Employment estimate, then dividing by the number of years in the projection period. $(projemp - estemp) / \text{No. years}$
18. aopenr	numeric(9)		A value representing the annual average openings due to net replacement. The value is calculated by dividing the total openings due to net replacements (in the projection period) by the number of years in the projection period.
19. aopent	numeric(9)		A value representing the total annual average openings due to growth and net replacements.
20. exits	numeric(9)		The number of exits from the labor force.
21. annualexits	numeric(9)		The annual number of exits from the labor force.
22. transfers	numeric(9)		The number of transfers from one occupation to another.
23. annualtransfers	numeric(9)		The annual number of transfers from one occupation to another.

**iomatrix**

Table of the industry-occupation employment matrix.

Field Name	Type	Constraint	Description
24. change	numeric(9)		The change in employment from estimated to projected.
25. annualchange	numeric(9)		The annual change in employment from estimated to projected.
26. openings	numeric(9)		Total openings = Exits+Transfers+Change
27. annualopenings	numeric(9)		Annual openings
28. suppress	char(1)		An indicator that the record contains confidential data that must be suppressed for public use: 0 = Not Confidential; 1 = Confidential

Constraint Information			
1. Foreign Key (iomatrix.stfips, iomatrix.reatype, iomatrix.area) references (geog.stfips, geog.reatype, geog.area) 2. Foreign Key (iomatrix.stfips, iomatrix.matincode, iomatrix.periodid) references (inddir.stfips, inddir.matincode, inddir.periodid) 3. Foreign Key (iomatrix.stfips, iomatrix.matoccode, iomatrix.periodid) references (occdir.stfips, occdir.matoccode, occdir.periodid) 4. Foreign Key (iomatrix.stfips, iomatrix.growcode) references (growcode.stfips, growcode.growcode)			

**iowage**

Table of wages by industry and occupation, from any source, including OES.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3, 4, 5	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area : e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.).
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
7. indcdty	char(2)	Primary Key 4	Code describing the industry code type.
8. indcode	char(6)	Primary Key 4	A code used in the classification of establishments by type of activity in which they are engaged. For codes not 6 characters long, left justify and blank (ASCII 32) fill. Either SIC or NAICS code can be used.
9. occodetype	char(2)	Primary Key 3	Code describing the type of occupational coding system.
10. occcode	char(10)	Primary Key 3	The occupational classification code used by the state for this data element. This code could be a DOT, OES, SOC, CENSUS, etc. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
11. wagesource	char(1)	Primary Key 5	A code representing the source of the wage data.
12. ratetype	char(1)	Primary Key 6	Code which identifies the type of wage rate.
13. empcount	numeric(10)		Total employment.
14. response	numeric(6)		Response rate for the occupation's actual or real survey data. Does NOT include imputed data in the rate calculation.
15. mean	numeric(9,2)		Mean wage for the occupation.
16. entrywg	numeric(9,2)		Entry level wage for the occupation, mean of the first third (ALC definition).
17. experience	numeric(9,2)		Experienced level wage for the occupation, mean of upper two thirds (ALC definition).
18. pct10	numeric(9,2)		Wage at tenth percentile.
19. pct25	numeric(9,2)		Wage at twenty-fifth percentile.
20. median	numeric(9,2)		Median wage of the occupation; also the wage at fiftieth percentile.
21. pct75	numeric(9,2)		Wage at seventy-fifth percentile.
22. pct90	numeric(9,2)		Wage at ninetieth percentile.
23. udpct	numeric(3)		User defined percentile.
24. udpctwage	numeric(9,2)		Wage at user defined percentile.
25. udrglopct	numeric(3)		Low percentile for user defined range.
26. udrnghipct	numeric(3)		High percentile for user defined range.
27. udrgmean	numeric(9,2)		Mean wage for user defined range.
28. wpctrelerr	numeric(6,2)		Relative percent error on wage.
29. epctrelerr	numeric(6,2)		Relative percent error on employment.
30. panelcode	char(6)		Reference panel code (yyyymm)
31. suppressall	char(1)		An indicator that the record contains confidential data.

**iowage**

Table of wages by industry and occupation, from any source, including OES.

Field Name	Type	Constraint	Description
32. suppresemp	char(1)		An indicator that the employment values should be suppressed.
33. suppresswage	char(1)		An indicator that the wage values should be suppressed.
<b>Constraint Information</b>			
1. Foreign Key (iowage.stfips, iowage.areatype, iowage.area) references (geog.stfips, geog.areatype, geog.area) 2. Foreign Key (iowage.periodyear, iowage.periodtype, iowage.period) references (period.periodyear, period.periodtype, period.period) 3. Foreign Key (iowage.stfips, iowage.occodetype, iowage.occcode) references (occcodes.stfips, occcodes.codetype, occcodes.code) 4. Foreign Key (iowage.stfips, iowage.indcodty, iowage.indcode) references (indcodes.stfips, indcodes.codetype, indcodes.code) 5. Foreign Key (iowage.stfips, iowage.wagesource) references (wgsource.stfips, wgsource.wagesource) 6. Foreign Key (iowage.ratetype) references (ratetype.ratetype)			

**jvs**

Table of vacancy estimates from the Job Vacancy Survey with main levels of data cube identifying each cell.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3, 4, 5, 6	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.
7. ownership	char(2)	Primary Key 3	Ownership is a 2-digit indicator that identifies the employer by public or private ownership.
8. indcdty	char(2)	Primary Key 4	Code describing the industry code type.
9. indcode	char(6)	Primary Key 4	A code used in the classification of establishments by type of activity in which they are engaged. For codes not 6 characters long, left justify and blank (ASCII 32) fill. Either SIC or NAICS code can be used.
10. occodetype	char(2)	Primary Key 5	Code describing the type of occupational coding system
11. occocode	char(10)	Primary Key 5	The occupational classification code used by the state for this data element. This code could be a DOT, OES, SOC, CENSUS, etc. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
12. sizeclass	char(2)	Primary Key 6	A 2-digit code identifying the size of the establishment's workforce.
13. jvscellid	Int		Unique ID for relating jvsaddit to jvs
14. vacancies	numeric(7)		Estimated number of openings.
15. vacanrate	numeric(3,1)		Estimated rate of openings
16. medianwage	numeric(9,2)		Median wage offered.
17. meanwage	numeric(9,2)		Mean wage offered.
18. minwage	numeric(9,2)		Min wage offered.
19. maxwage	numeric(9,2)		Max wage offered.
20. suppress	char(1)		An indicator that the record contains confidential data that must be suppressed for public use. 0 = Not Suppressed; 1 = Suppress data

**Constraint Information**

1. Foreign Key (jvs.stfips, jvs.areatype, jvs.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (jvs.periodyear, jvs.periodtype, jvs.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (jvs.stfips, jvs.ownership) references (ownershp.stfips, ownershp.ownership)
4. Foreign Key (jvs.stfips, jvs.indcdty, jvs.indcode) references (indcodes.stfips, indcodes.codetype, indcodes.code)
5. Foreign Key (jvs.stfips, jvs.occodetype, jvs.occcode) references (occcodes.stfips, occcodes.codetype, occcodes.code)
6. Foreign Key (jvs.stfips, jvs.sizeclass) references (sizeclas.stfips, sizeclas.sizeclass)

**Table Notes**

- 1: Unique constraint: combination of stfips and jvscellid cannot be duplicated.

**jvsaddit**

Table of vacancy estimates from the Job Vacancy Survey with additional data cell level detail.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 2, 3, 4, 5	State FIPS Code
2. jvscellid	int	Primary Key 1	Unique ID for relating jvsaddit to jvs
3. partfull	char(1)	Primary Key	Code indicating whether or not openings are part or full time: 0 = both; 1 = part-time; 2 = full-time
4. permseas	char(1)	Primary Key	Code indicating whether or not openings are permanent or seasonal: 0 = both; 1 = seasonal; 2 = permanent
5. lengthopen	char(1)	Primary Key 2	Code indicating range of how long vacancy has been open.
6. edulevel	char(1)	Primary Key 3	Code indicating education level required.
7. explevel	char(1)	Primary Key 4	Code indicating experience level required.
8. certreq	char(1)	Primary Key	Code indicating if certificate is required: 0 = both; 1 = certificate required; 2 = no certificate required
9. benefit	char(1)	Primary Key 5	Code indicating benefit offered.
10. percentopn	numeric(3)		Percent of vacancies with criteria (e.g. )
11. suppress	char(1)		An indicator that the record contains confidential data that must be suppressed for public use. 0 = Not Suppressed; 1 = Suppress data

**Constraint Information**

1. Foreign Key (jvsaddit.stfips, jvsaddit.jvscellid) references (jvs.stfips, jvs.jvscellid)
2. Foreign Key (jvsaddit.stfips, jvsaddit.lengthopen) references (lengthopen.stfips, lengthopen.lengthopen)
3. Foreign Key (jvsaddit.stfips, jvsaddit.edulevel) references (edulevel.stfips, edulevel.edulevel)
4. Foreign Key (jvsaddit.stfips, jvsaddit.explevel) references (explevel.stfips, explevel.explevel)
5. Foreign Key (jvsaddit.stfips, jvsaddit.benefit) references (benefit.stfips, benefit.benefit)

<b>labforce</b>			
Employment and unemployment estimates reported from the Local Area Unemployment Statistics.			
<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to 00 where periodtype is annual.
7. adjusted	char(1)	Primary Key	Indicates if record contains seasonally adjusted data. 1 = adjusted; 0 = not adjusted
8. prelim	char(1)	Primary Key	Indicates preliminary data: 0 = Not preliminary; 1 = preliminary
9. benchmark	char(4)	3	Benchmark year of the data.
10. laborforce	numeric(9)		Civilian labor force.
11. emplab	numeric(9)		Number employed by place of residence.
12. unemp	numeric(9)		Number unemployed.
13. unemprate	numeric(5,1)		Unemployment rate.
14. clfrate	numeric(5,1)		Civilian labor force participation rate
15. emppopratio	numeric(5,1)		Employment to population ratio

<b>Constraint Information</b>			
1. Foreign Key (labforce.stfips, labforce.areatype, labforce.area) references (geog.stfips, geog.areatype, geog.area)			
2. Foreign Key (labforce.periodyear, labforce.periodtype, labforce.period) references (period.periodyear, period.periodtype, period.period)			
3. Foreign Key (labforce.benchmark) references (benchmark.benchmark)			

<b>Table Notes</b>			
1: PLEASE NOTE: If aggregating smaller area records into larger areas, do not use rounded data records. This is particularly important for applications that sum records across areas.			

**licauth**

Revised in v2.8

Table of licensing authorities for the state.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. licauthid	char(3)	Primary Key	A unique identifier for the licensing authority.
5. department	varchar(255)		The State department responsible for regulation.
6. division	varchar(255)		The division, office, or section of the department responsible for regulation (may be NULL).
7. board	varchar(255)		Complete name of regulatory board.
8. address1	varchar(75)		Address of licensing authority.
9. address2	varchar(75)		Second line for address.
10. city	varchar(30)		City.
11. st	char(2)		State.
12. zip	char(5)		Postal zip code for the business address.
13. zipext	char(4)		Four digit zip code extension.
14. latitude	numeric(11,6)		Physical location - latitude
15. longitude	numeric(11,6)		Physical location - longitude
16. geocode	char(1)	2	Physical location - geocode precision level code. The precision of the longitude and latitude coordinates.
17. telephone	varchar(10)		Phone number.
18. teleext	varchar(10)		Phone number extension.
19. fax	varchar(10)		Licensing agency fax number.
20. contact	varchar(50)		Name of person to contact at the licensing agency.
21. email	varchar(70)		Licensing agency e-mail address.
22. url	varchar(200)		Uniform Resource Locator for the licensing agency.

**Constraint Information**

1. Foreign Key (licauth.stfips, licauth.areatype, licauth.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (licauth.geocode) references (geocode.geocode)

**license**

Revised in v2.8

Table of individual licenses authorized by a state.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code
2. areatype	char(2)	1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. licenseid	char(10)	Primary Key	A code that identifies the license for the specific occupational title.
5. licauthid	char(3)	1	A unique code that identifies the licensing authority.
6. lictitle	varchar(200)		License title.
7. licdesc	varchar(MAX)		Narrative description of the license.
8. licensetype	char(1)	2	An indicator of the type of license
9. exam	char(1)	3	An indicator of the exam requirements of the license
10. education	char(1)	4	An indicator of the education requirements of the license
11. continuingedu	char(1)	5	An indicator of the continuing education requirements of the license
12. certification	char(1)	6	An indicator of the certification requirements of the license
13. experience	char(1)	7	An indicator of the experience requirements of the license
14. criminal	char(1)	8	An indicator of restrictions on criminal records
15. physical	char(1)	9	An indicator of physical requirements
16. veteran	char(1)	10	An indicator of the type of veteran's preference
17. inactive	char(1)	11	An indicator of the active status of the license
18. licenseurl	char(200)		Uniform Resource Locator for license information
19. licenseupdated	char(8)		Last date the license information was updated. Format: yyyyymmdd

**Constraint Information**

1. Foreign Key (license.stfips, license.areatype, license.area, license.licauthid) references (licauth.stfips, licauth.areatype, licauth.area, licauth.licauthid)
2. Foreign Key (license.licensetype) references (licensetypes.licensetype)
3. Foreign Key (license.exam) references (licenseexams.licenseexam)
4. Foreign Key (license.education) references (licenseeducation.licenseeducation)
5. Foreign Key (license.continuingedu) references (liccontinuingedu.licensecontinuingedu)
6. Foreign Key (license.certification) references (licensecertification.licensecertification)
7. Foreign Key (license.experience) references (licenseexperience.licenseexperience)
8. Foreign Key (license.criminal) references (licensecriminal.licensecriminal)
9. Foreign Key (license.physical) references (licensephysicalreqs.licensephysical)
10. Foreign Key (license.veteran) references (licenseveteran.licveteran)
11. Foreign Key (license.inactive) references (licenseactivestatus.licensestatus)

**lichist**

Table of the number of licenses awarded for a selected occupation.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3	State FIPS code.
2. areatype	char(2)	1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
7. licenseid	char(10)	Primary Key 3	A code that identifies the license for the specific occupational title.
8. licnumtype	char(2)	Primary Key 4	A code that identifies the type of license information.
9. licnum	numeric(6)		A numerical value that represents the number of licenses awarded.
<b>Constraint Information</b>			
1. Foreign Key (lichist.stfips, lichist.areatype, lichist.area) references (geog.stfips, geog.areatype, geog.area)			
2. Foreign Key (lichist.periodyear, lichist.periodtype, lichist.period) references (period.periodyear, period.periodtype, period.period)			
3. Foreign Key (lichist.stfips, lichist.licenseid) references (license.stfips, license.licenseid)			
4. Foreign Key (lichist.licnumtype) references (licnumty.licnumtype)			

mls				DEPRECATED in v2.8
Mass layoff statistics summary table.				
Field Name	Type	Constraint	Description	
1. stfips	char(2)	Primary Key 1, 3, 4, 7	State FIPS code.	
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.	
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.	
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006)	
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)	
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.	
7. indcdty	char(2)	Primary Key 3	Code describing the industry code type.	
8. indcode	char(6)	Primary Key 3	A code used in the classification of establishments by type of activity in which they are engaged. For codes not 6 characters long, left justify and blank (ASCII 32) fill. Either SIC or NAICS code can be used.	
9. ownership	char(2)	Primary Key 4	Ownership is a 2-digit indicator that identifies the employer by public or private ownership.	
10. gender	char(1)	Primary Key 5	Claimant gender.	
11. raceethn	char(5)	Primary Key 6	Code indicating ethnicity and race of claimants.	
12. agegroup	char(2)	Primary Key 7	Age Group of claimants.	
13. veteran	char(1)	Primary Key 8	Code for veteran status of claimants.	
14. worksite	char(1)	Primary Key 9	Code for status of worksite: open or closed.	
15. prisepcodetype	char(2)	Primary Key 10	Code indicating which series of separating reason codes the primary separation code belongs to.	
16. prisepcd	char(2)	Primary Key 10	Primary reason code for layoff.	
17. separat	numeric(6)		Number of people separated.	
18. claimants	numeric(6)		Number of UI claimants.	
19. events	numeric(4)		Number of MLS events.	
20. suppress	char(1)		An indicator that the record contains confidential data that must be suppressed for public use. 0 = Not Suppressed 1 = Suppress MLS record	

**mls****DEPRECATED in v2.8**

Mass layoff statistics summary table.

Field Name	Type	Constraint	Description
<b>Constraint Information</b>			
1.	Foreign Key (mls.stfips, mls.areatype, mls.area) references (geog.stfips, geog.areatype, geog.area)		
2.	Foreign Key (mls.periodyear, mls.periodtype, mls.period) references (period.periodyear, period.periodtype, period.period)		
3.	Foreign Key (mls.stfips, mls.indcodty, mls.indcode) references (indcodes.stfips, indcodes.codetype, indcodes.code)		
4.	Foreign Key (mls.stfips, mls.ownership) references (ownershp.stfips, ownershp.ownership)		
5.	Foreign Key (mls.gender) references (gender.gender)

<b>mlsclaim</b>				<b>DEPRECATED in v2.8</b>
Mass Layoff Statistics claims.				
Field Name	Type	Constraint	Description	
1. stfips	char(2)	Primary Key 1, 6	State FIPS code.	
2. areatype	char(2)	1	Code describing type of geographic area: e.g. county, service delivery area, MSA.	
3. area	char(6)	1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.	
4. periodyear	char(4)	2	Character representation of the calendar year (e.g. 2006).	
5. periodtype	char(2)	2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)	
6. period	char(2)	2	Period Code. Will be set to '00' where periodtype is annual.	
7. uiaccount	char(10)	Primary Key 6	A unique 10-digit number assigned to individual employers.	
8. eventid	char(3)	Primary Key 6	Code identifying a specific MLS event.	
9. ssn	char(9)	Primary Key	Claimant social security number.	
10. gender	char(1)	3	Claimant gender.	
11. raceethn	char(5)	4	Code indicating ethnicity and race of claimants.	
12. birthday	date		Birthday of claimant in the form yyyyymmdd.	
13. veteran	char(1)	5	Code for veteran status of claimant.	
14. finalpay	char(1)		Final pay total. Yes/no - this may be a bit field in some rdbms. 0 = No; 1 = Yes	
15. claimtype	char(1)		Indicates type of initial unemployment claim: 1 = New Claim; 2 = Additional Claim; 9 = Unknown	
16. finalweek	date		Date of the week of final payment in the form yyyyymmdd.	
<b>Constraint Information</b>				
1. Foreign Key (mlsclaim.stfips, mlsclaim.areatype, mlsclaim.area) references (geog.stfips, geog.areatype, geog.area)				
2. Foreign Key (mlsclaim.periodyear, mlsclaim.periodtype, mlsclaim.period) references (period.periodyear, period.periodtype, period.period)				
3. Foreign Key (mlsclaim.gender) references (gender.gender)				
4. Foreign Key (mlsclaim.raceethn) references (raceethn.raceethn)				
5. Foreign Key (mlsclaim.veteran) references (vetcode.veteran)				
6. Foreign Key (mlsclaim.stfips, mlsclaim.uiaccount, mlsclaim.eventid) references (mlsevent.stfips, mlsevent.uiaccount, mlsevent.eventid)				

mlsevent				DEPRECATED in v2.8
Mass Layoff Statistics events.				
Field Name	Type	Constraint	Description	
1. stfips	char(2)	Primary Key 1, 4	State FIPS code.	
2. areatype	char(2)	1	Code describing type of geographic area: e.g. county, service delivery area, MSA.	
3. area	char(6)	1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.	
4. periodyear	char(4)	2	Character representation of the calendar year (e.g. 2006).	
5. periodtype	char(2)	2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)	
6. period	char(2)	2	Period Code. Will be set to '00' where periodtype is annual.	
7. uiaccount	char(10)	Primary Key	A unique 10-digit number assigned to individual employers.	
8. eventid	char(3)	Primary Key	Event ID.	
9. siccode	char(4)	3	A code used in the classification of establishments by type of activity in which they are engaged. This field is left justified and padded with zeroes. A siccode of 9999 means non-classifiable; industry not specified.	
10. naicscode	char(6)	10	A code used in the North American Industry Classification System (NAICS).	
11. ownership	char(2)	4	Ownership is a 2-digit indicator that identifies the employer by public or private ownership.	
12. name1	varchar(35)		Name of firm.	
13. name2	varchar(35)		Additional space for firm name.	
14. address1	varchar(35)		Address of firm.	
15. city	varchar(30)		City.	
16. st	char(2)		State.	
17. zip	char(9)		Postal zip code for the business address.	
18. meeicode	char(1)	5	The meeicode.	
19. telephone	char(10)		Telephone number.	
20. teleext	varchar(6)		Telephone number extension.	
21. worksite	char(1)	6	Code for status of worksite: open or closed.	
22. preemp	numeric(6)		Pre-layoff employment.	
23. separat	numeric(6)		Number of people separated.	
24. prisepcodetype	char(2)	7	Code indicating which series of separation reason codes the primary separation code belongs to.	
25. prisepcd	char(2)	7	Primary reason code for layoff.	
26. secsepcodetype	char(2)	8	Code indicating which series of separation reason codes the secondary separation code belongs to.	
27. secsepcd	char(2)	8	Secondary reason code for layoff.	
28. layweek	date		Week in which layoff occurred in form of yyyyymmdd.	
29. eventtype	char(1)	9	Code for the type of event.	
30. dwvertype	char(1)	11	Code to indicate type of Dislocated worker event.	

**mlsevent****DEPRECATED in v2.8**

Mass Layoff Statistics events.

Field Name	Type	Constraint	Description
<b>Constraint Information</b>			
1. Foreign Key (mlsevent.stfips, mlsevent.areatype, mlsevent.area) references (geog.stfips, geog.areatype, geog.area) 2. Foreign Key (mlsevent.periodyear, mlsevent.periodtype, mlsevent.period) references (period.periodyear, period.periodtype, period.period) 3. Foreign Key (mlsevent.siccode) references (siccode.siccode) 4. Foreign Key (mlsevent.stfips, mlsevent.ownership) references (ownership.stfips, ownership.ownership) 5. Foreign Key (mlsevent.meeicode) references (meeicode.meeicode) 6. Foreign Key (mlsevent.worksite) references (worksite.worksite) 7. Foreign Key (mlsevent.prisepcoctype, mlsevent.prisepcd) references (mlsepcoctype.mlssepcoctype, mlssepcoctype.mlssepcoctype) 8. Foreign Key (mlsevent.secsepcoctype, mlsevent.secsepcd) references (mlsepcoctype.mlssepcoctype, mlssepcoctype.mlssepcoctype) 9. Foreign Key (mlsevent.eventtype) references (eventtyp.eventtype) 10. Foreign Key (mlsevent.naicscode) references (naiccode.naicscode) 11. Foreign Key (mlsevent.dwvertyp) references (dwvertyp.dwvertyp)			

**occprj****DEPRECATED in v2.6**

Table of occupational employment projections by geographies.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 2, 3	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodid	char(2)	Primary Key 2	A 2-digit code identifying the base and projected periods.
5. matoccode	char(10)	Primary Key 2	Matrix occupation code from Micro Matrix. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
6. estoccprj	numeric(9)		A value representing a base year employment estimate for an occupation.
7. projoccprj	numeric(9)		A numerical value representing the projected year employment estimate for an occupation.
8. grrate	numeric(7,4)		A value representing the annualized percentage growth. This value is calculated by dividing the Projected year by the Base year. Taking the results to the 1/n power, where n is the number of years in the projection period, subtracting 1 from the result and multiplying that result by 100. $100.grrate = (((projoccprj/estoccprj)^{1/n}) - 1) * 100$
9. nchg	numeric(9)		Numeric Change between the projected estimate and the base estimate.
10. pchg	numeric(7,4)		Percent change over period. $((projoccprj - estoccprj)/estoccprj) * 100$
11. aopeng	numeric(9)		A value representing the annual average openings due to growth. The value is calculated by subtracting the Base Year Employment estimate from the Projected Year Employment estimate, then dividing by the number of years in the projection period. $(projoccprj - estoccprj) / \text{No. years}$
12. aopenr	numeric(9)		A value representing the annual average openings due to net replacement. The value is calculated by dividing the total openings due to net replacements (in the projection period) by the number of years in the projection period.
13. aopent	numeric(9)		A value representing the total annual average openings due to growth and net replacements.
14. growcode	char(2)	3	A descriptor to allow for state specific interpretation of the industry or occupation.
15. suppress	char(1)		An indicator that the record contains confidential data that must be suppressed for public use. 0 = Not Suppressed    1 = Suppressed

**Constraint Information**

1. Foreign Key (occprj.stfips, occprj.areatype, occprj.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (occprj.stfips, occprj.matoccode, occprj.periodid) references (occdir.stfips, occdir.matoccode, occdir.periodid)
3. Foreign Key (occprj.stfips, occprj.growcode) references (growcode.stfips, growcode.growcode)

**oeswage****DEPRECATED in v2.6**

Table of wage data by Occupational Employment Statistics occupation.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3, 4, 5	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area : e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.).
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
7. indcdty	char(2)	Primary Key 4	Code describing the industry code type.
8. indcode	char(6)	Primary Key 4	A code used in the classification of establishments by type of activity in which they are engaged. For codes not 6 characters long, left justify and blank (ASCII 32) fill. Either SIC or NAICS code can be used. A siccode of 9999 means non-classifiable; industry not specified.
9. occodetype	char(2)	Primary Key 3	Code describing the type of occupational coding system.
10. occcode	char(10)	Primary Key 3	The occupational classification code used by the state for this data element. This code could be a DOT, OES, SOC, CENSUS, etc. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
11. wagesource	char(1)	Primary Key 5	A code representing the source of the wage data.
12. ratetype	char(1)	Primary Key 6	Code which identifies the type of wage rate.
13. empcount	numeric(10)		Total employment.
14. response	numeric(6)		Response rate for the occupation's actual or real survey data. Does NOT include imputed data in the rate calculation.
15. mean	numeric(9,2)		Mean wage for the occupation.
16. entrywg	numeric(9,2)		Entry level wage for the occupation, mean of the first third (ALC definition).
17. experience	numeric(9,2)		Experienced level wage for the occupation, mean of upper two thirds (ALC definition).
18. pct10	numeric(9,2)		Wage at tenth percentile.
19. pct25	numeric(9,2)		Wage at twenty-fifth percentile.
20. median	numeric(9,2)		Median wage of the occupation; also the wage at fiftieth percentile.
21. pct75	numeric(9,2)		Wage at seventy-fifth percentile.
22. pct90	numeric(9,2)		Wage at ninetieth percentile.
23. udpct	numeric(3)		User defined percentile.
24. udpctwage	numeric(9,2)		Wage at user defined percentile.
25. udrglopct	numeric(3)		Low percentile for user defined range.
26. udrgnhipct	numeric(3)		High percentile for user defined range.
27. udrgngmean	numeric(9,2)		Mean wage for user defined range.
28. wpctrelerr	numeric(6,2)		Relative percent error on wage.
29. epctrelerr	numeric(6,2)		Relative percent error on employment.
30. panelcode	char(6)		Reference panel code (yyyymm)

**oeswage****DEPRECATED in v2.6**

Table of wage data by Occupational Employment Statistics occupation.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
31. suppressoes	char(1)		An indicator that the record contains confidential data that must be suppressed for public use: 0 = Not Suppressed; 1 = Suppress employment data; 2 = Suppress wage data; 3 = Suppress employment & wage data
32. meansup	char(1)		Suppress mean wage for the occupation: 0 = Not Suppressed; 2 = Suppress wage data
33. entrywgsup	char(1)		Suppress entry level wage for the occupation: 0 = Not Suppressed; 2 = Suppress wage data
34. experiencesup	char(1)		Suppress experienced level wage for the occupation: 0 = Not Suppressed; 2 = Suppress wage data
35. pct10sup	char(1)		Suppress wage at tenth percentile: 0 = Not Suppressed; 2 = Suppress wage data
36. pct25sup	char(1)		Suppress wage at twenty-fifth percentile: 0 = Not Suppressed; 2 = Suppress wage data
37. mediansup	char(1)		Suppress median wage of the occupation: 0 = Not Suppressed; 2 = Suppress wage data
38. pct75sup	char(1)		Suppress wage at seventy-fifth percentile: 0 = Not Suppressed; 2 = Suppress wage data
39. pct90sup	char(1)		Suppress wage at ninetieth percentile: 0 = Not Suppressed; 2 = Suppress wage data
40. udpctwagesup	char(1)		Suppress wage at user defined percentile: 0 = Not Suppressed; 2 = Suppress wage data
41. udrngmeansup	char(1)		Suppress mean wage for user defined range: 0 = Not Suppressed; 2 = Suppress wage data

**Constraint Information**

1. Foreign Key (oeswage.stfips, oeswage.areatype, oeswage.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (oeswage.periodyear, oeswage.periodtype, oeswage.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (oeswage.stfips, oeswage.occodetype, oeswage.occcode) references (occcodes.stfips, occcodes.codetype, occcodes.code)
4. Foreign Key (oeswage.stfips, oeswage.indcodty, oeswage.indcode) references (indcodes.stfips, indcodes.codetype, indcodes.code)
5. Foreign Key (oeswage.stfips, oeswage.wagesource) references (wgsource.stfips, wgsource.wagesource)
6. Foreign Key (oeswage.ratetype) references (ratetype.ratetype)

**payment**

Table of Government Transfer Payments.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
7. paytype	char(2)	Primary Key 3	A 2-digit code indicating type of payment.
8. amountpaid	numeric(10)		Amount paid in thousands.
<b>Constraint Information</b>			
1. Foreign Key (payment.stfips, payment.areatype, payment.area) references (geog.stfips, geog.areatype, geog.area)			
2. Foreign Key (payment.periodyear, payment.periodtype, payment.period) references (period.periodyear, period.periodtype, period.period)			
3. Foreign Key (payment.stfips, payment.paytype) references (paytype.stfips, paytype.paytype)			

**populatn**

This table contains population estimates for a geographic area and time period.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
7. popsource	char(1)	Primary Key 3	Source Code for population data.
8. population	numeric(10)		Number representing the population total for the specified geographic area and time period.
9. releasedate	char(8)		Release Date (yyyymmdd)
<b>Constraint Information</b>			
1. Foreign Key (populatn.stfips, populatn.areatype, populatn.area) references (geog.stfips, geog.areatype, geog.area)			
2. Foreign Key (populatn.periodyear, populatn.periodtype, populatn.period) references (period.periodyear, period.periodtype, period.period)			
3. Foreign Key (populatn.stfips, populatn.popsource) references (popsource.stfips, popsource.popsource)			

**progcomp**

This table contains information about program completers.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3, 4, 5	State FIPS code.
2. areatype	char(2)	1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. instcode	char(10)	Primary Key 4	Unique code representing the institution.
5. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
6. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.).
7. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
8. codetype	char(2)	Primary Key 5	Code describing the type of occupation or training code.
9. code	char(10)	Primary Key 5	The classification code used by the state for this data element. This code could be DOT, OES, CIP, Cluster, SOC, Census, etc. For codes not 10 character long, left justify and blank (ASCII 32) fill.
10. compltype	char(2)	Primary Key 3	A 2-digit code representing type of program completer.
11. completers	numeric(8)		Number of program completers.
12. placecomp	varchar(MAX)		Information about post completion labor force status of completers.

**Constraint Information**

1. Foreign Key (progcomp.stfips, progcomp.areatype, progcomp.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (progcomp.periodyear, progcomp.periodtype, progcomp.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (progcomp.stfips, progcomp.compltype) references (compltyp.stfips, compltyp.compltype)
4. Foreign Key (progcomp.stfips, progcomp.instcode) references (schools.stfips, schools.instcode)
5. Foreign Key (progcomp.stfips, progcomp.codetype, progcomp.code) references (occodes.stfips, occodes.codetype, occodes.code)

**programs**

Revised in v2.8

This table contains information about occupational training

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1, 2, 3, 4, 5, 6	State FIPS code.
2. areatype	char(2)	1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. instcode	char(10)	Primary Key 2	Unique code representing the institution / training provider.
5. codetype	char(2)	Primary Key 3	Code describing the type of occupation or training code.
6. code	char(10)	Primary Key 3	The classification code used by the state for this data element. This code could be DOT, OES, CIP, Cluster, SOC, Census, etc. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
7. compltype	char(2)	Primary Key 4	A 2-digit code representing type of program completed.
8. length	numeric(4)		The length of the training program at the institution (years, months, weeks, etc.)
9. lengthtype	char(2)	5	The identifying code assigned to the program length.
10. progcost	numeric(6)		The cost of the program.
11. progttitle	varchar(200)		Title used by the training provider for the program.
12. progdesc	varchar(MAX)		A narrative summary of the program objective.
13. cipcodetype	char(2)	6	Code describing the CIP version used.
14. cipcode	char(10)	6	A 10-digit code assigned to a Classification of Institutional Programs (CIP) program title.
15. url	varchar(200)		Uniform Resource Locator for the program.
16. classroom	char(1)		Classroom instruction: 1 = yes; 0 = no
17. online	char(1)		Online instruction: 1 = yes; 0 = no
18. classtime	char(1)	7	Times class is held; see field values
19. etplapproval	char(1)		ETPL approved program: 1 = approved; 0 = not approved
<b>Constraint Information</b>			
<ol style="list-style-type: none"> <li>1. Foreign Key (programs.stfips, programs.areatype, programs.area) references (geog.stfips, geog.areatype, geog.area)</li> <li>2. Foreign Key (programs.stfips, programs.instcode) references (schools.stfips, schools.instcode)</li> <li>3. Foreign Key (programs.stfips, programs.codetype, programs.code) references (occcodes.stfips, occcodes.codetype, occcodes.code)</li> <li>4. Foreign Key (programs.stfips, programs.compltype) references (compltyp.stfips, compltyp.compltype)</li> <li>5. Foreign Key (programs.stfips, programs.lengthtype) references (lentype.stfips, lentype.lengthtype)</li> <li>6. Foreign Key (programs.stfips, programs.cipcodetype, programs.cipcode) references (occcodes.stfips, occcodes.codetype, occcodes.code)</li> <li>7. Foreign Key (programs.classtime) references (classtime.classtime)</li> </ol>			

**propval****DEPRECATED in v2.8**

Table of property value data by geography and tax type.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.).
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
7. taxtype	char(2)	Primary Key 3	A 2-digit code identifying the type of tax.
8. propvalue	numeric(15)		Total property value.
9. taxvalue	numeric(15)		Taxable property value.
10. millrate	numeric(6,4)		Tax rate charged per thousand dollars of taxable value.

**Constraint Information**

1. Foreign Key (propval.stfips, propval.areatype, propval.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (propval.periodyear, propval.periodtype, propval.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (propval.stfips, propval.taxtype) references (taxtype.stfips, taxtype.taxtype)

**qwicchar**

Table of the Quarterly Workforce Indicators (QWI) data.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3, 4, 6	State FIPS code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area
3. area	char(6)	Primary Key 1	6-digit code assigned to represent a geographic area
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period
6. period	char(2)	Primary Key 2	Period code; will be set to 00 when periodtype is annual
7. indcdty	char(2)	Primary Key 3	Code describing the industry code type
8. indcode	char(6)	Primary Key 3	A code representing the industry
9. ownership	char(2)	Primary Key 4	2-digit indicator that describes the company by type of ownership - public/private/total
10. gender	char(1)	Primary Key 5	Code describing the gender
11. agegroup	char(2)	Primary Key 6	Code describing either a single or range of ages
12. qwiid	integer(0)		Unique identifier for each record within each state

**Constraint Information**

1. Foreign Key (qwicchar.stfips, qwicchar.areatype, qwicchar.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (qwicchar.periodyear, qwicchar.periodtype, qwicchar.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (qwicchar.stfips, qwicchar.indcdty, qwicchar.indcode) references (indcodes.stfips, indcodes.codetype, indcodes.code)
4. Foreign Key (qwicchar.stfips, qwicchar.ownership) references (ownershp.stfips, ownershp.ownership)
5. Foreign Key (qwicchar.gender) references (gender.gender)
6. Foreign Key (qwicchar.stfips, qwicchar.agegroup) references (agegroup.stfips, agegroup.agegroup)

**Table Notes**

- 1: Unique Constraint: combination of stfips and qwiid cannot be duplicated.

**qwidata**

This table contains summary Quarterly Workforce Indicator (QWI) data.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS code
2. qwiid	integer(0)	Primary Key 1	Unique identifier for each record within each state
3. qwitype	char(2)	Primary Key 2	Code describing the type of QWI variable
4. qwivalue	numeric(16,2)		The value for the QWI variable
5. qwisup	char(1)	3	Code describing the suppression for the QWI value

Constraint Information			
1. Foreign Key (qwidata.stfips, qwidata.qwiid) references (qwichar.stfips, qwichar.qwiid)			
2. Foreign Key (qwidata.qwitype) references (qwitype.qwitype)			
3. Foreign Key (qwidata.qwisup) references (qwisup.qwisup)			

**sales**

Revenue from retail sales.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1, 3	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.).
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
7. salestype	char(2)	Primary Key 3	Code describing the type of sales statistic. (e.g. Retail sales are coded 01)
8. sales	numeric(15)		Sales Dollar amount.

Constraint Information			
1. Foreign Key (sales.stfips, sales.areatype, sales.area) references (geog.stfips, geog.areatype, geog.area)			
2. Foreign Key (sales.periodyear, sales.periodtype, sales.period) references (period.periodyear, period.periodtype, period.period)			
3. Foreign Key (sales.stfips, sales.salestype) references (salestyp.stfips, salestyp.salestype)			

**schools**

Table of training providers in the state.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 2	State FIPS code.
2. areatype	char(2)	1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. instcode	char(10)	Primary Key	Unique code representing the institution.
5. insttype	char(2)	2	Identifies the type of training institution (WIA Provider, vocational center, community college, university).
6. instown	char(1)	3	Institution ownership code.
7. instname1	varchar(80)		Primary name of the training institution.
8. instname2	varchar(80)		Secondary name of the training institution.
9. address1	varchar(35)		Address of the training institution.
10. address2	varchar(35)		Address of the training institution.
11. city	varchar(30)		City.
12. st	char(2)		State.
13. zip	char(5)		Postal zip code for the business address.
14. zipext	char(4)		Zip code extension.
15. latitude	numeric(11,6)		Physical location - latitude
16. longitude	numeric(11,6)		Physical location - longitude
17. geocode	char(1)	4	Physical location - geocode precision level code. The precision of the longitude and latitude coordinates.
18. telephone	char(10)		Training institution telephone number.
19. teleext	varchar(10)		Training institution telephone extension.
20. fax	char(10)		Training institution fax number.
21. url	varchar(200)		Uniform Resource Locator.
22. contact	varchar(50)		Name of person to contact at the training institution.
23. distancelearn	char(1)		Distance Learn: 1=distance learn or online or correspondence ONLY; 0=otherwise
24. satellitecampus	char(1)		Satellite Campus: 1=yes; 0=no (main campus)
<b>Constraint Information</b>			
1. Foreign Key (schools.stfips, schools.areatype, schools.area) references (geog.stfips, geog.areatype, geog.area)			
2. Foreign Key (schools.stfips, schools.insttype) references (insttype.stfips, insttype.insttype)			
3. Foreign Key (schools.instown) references (instown.instown)			
4. Foreign Key (schools.geocode) references (geocode.geocode)			

**stfirms**

Revised in v2.8

Table of employers, obtained from a state source, such as the ES-202/QCEW.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1, 4, 5, 6	State FIPS code.
2. areatype	char(2)	1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. uiaccount	char(10)	Primary Key	A unique 10-digit number assigned to individual employers.
5. reptunit	char(5)	Primary Key	Assigned to site locations for multi-unit employer.
6. yrqtr	char(6)		Year and quarter time stamp for the file
7. name1	varchar(35)		Legal name of the establishment.
8. name2	varchar(35)		Trade name of the establishment.
9. address1	varchar(35)		Business address of the establishment, line 1.
10. address2	varchar(35)		Business address of the establishment, line 2.
11. city	varchar(30)		City where the establishment is doing business.
12. st	char(2)		State where the establishment is doing business.
13. zip	char(5)		Postal zip code for the business address.
14. zipext	char(4)		Zip code extension.
15. addressty	char(1)	2	Address type indicator (i.e. physical, mailing,...)
16. latitude	numeric(11,6)		Latitude of location.
17. longitude	numeric(11,6)		Longitude of location.
18. geocode	char(1)	3	Physical location - geocode precision level code. The precision of the longitude and latitude coordinates.
19. telephone	varchar(10)		Telephone number of the business.
20. teleext	varchar(10)		Telephone extension.
21. employment	numeric(8)		The number of people by establishment.
22. indcodetype	char(2)	4	A code used in the classification of establishments by type of activity in which they are engaged. This field is left justified and padded with zeroes. A siccode of 9999 means non-classifiable; industry not specified.
23. indcode	char(6)	4	The industry code, based on the indcodetype. Currently the North American Industry Classification System (NAICS) system is being used.
24. ownership	char(2)	5	Ownership is a 2-digit indicator that identifies the employer by public or private ownership. The second digit is for state use.
25. sizeclass	char(2)	6	A 2-digit code identifying the size of the establishment's workforce.
26. busdesc	varchar(MAX)		A narrative description of the business activities of the establishment.

**Constraint Information**

1. Foreign Key (stfirms.stfips, stfirms.areatype, stfirms.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (stfirms.addressty) references (addressty.addressty)
3. Foreign Key (stfirms.geocode) references (geocode.geocode)
4. Foreign Key (stfirms.stfips, stfirms.indcodetype, stfirms.indcode) references (indcodes.stfips, indcodes.codetype, indcodes.code)
5. Foreign Key (stfirms.stfips, stfirms.ownership) references (ownershp.stfips, ownershp.ownership)
6. Foreign Key (stfirms.stfips, stfirms.sizeclass) references (sizeclas.stfips, sizeclas.sizeclass)

**stindprj****DEPRECATED in v2.6**

Table of short-term employment projections by industry.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 2, 3	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodid	char(2)	Primary Key 2	A 2-digit code identifying the type of period used.
5. matincode	char(15)	Primary Key 2	Industry matrix code from Micro Matrix.
6. estindst	numeric(9)		A numerical value representing a base year employment estimate for an industry.
7. projindst	numeric(9)		A value representing the projected year employment estimate for an industry.
8. nchg	numeric(9)		Numeric Change between the projected estimate and the base estimate.
9. grrate	numeric(7,4)		A value representing the annual average percentage growth rate. This value is calculated by dividing the Projected year by the Base year. Taking the results to the 1/n power, where n is the number of years in the projection period, subtracting 1 from the result and multiplying that result by 100.(((PROJINDST/ESTINDST)^{1/n}) - 1)*100
10. growcode	char(2)	3	A descriptor to allow for state specific interpretation of the industry or occupation.
11. suppress	char(1)		An indicator that the record contains confidential data that must be suppressed for public use: 0 = Not Suppressed; 1 = Suppressed

**Constraint Information**

1. Foreign Key (stindprj.stfips, stindprj.areatype, stindprj.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (stindprj.stfips, stindprj.matincode, stindprj.periodid) references (inndir.stfips, inndir.matincode, inndir.periodid)
3. Foreign Key (stindprj.stfips, stindprj.growcode) references (growcode.stfips, growcode.growcode)

**stoccprj****DEPRECATED in v2.6**

Table of short-term occupational employment projections.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 2, 3	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodid	char(2)	Primary Key 2	A 2-digit code identifying the type of period used.
5. matoccode	char(10)	Primary Key 2	Occupation matrix code from Micro Matrix. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
6. estoccst	numeric(9)		A numerical value representing a base year employment estimate for an occupation.
7. projoccst	numeric(9)		A value representing the projected year employment estimate for an occupation.
8. nchg	numeric(9)		Numeric Change between the projected estimate and the base estimate.
9. grrate	numeric(7,4)		A value representing the annual average percentage growth rate. This value is calculated by dividing the Projected year by the Base year. Taking the results to the 1/n power, where n is the number of years in the projection period, subtracting 1 from the result and multiplying that result by 100.(((PROJOCST/ESTOCCST)^(1/n)) - 1) *100)
10. aopeng	numeric(9)		A value representing the annual average openings due to growth. The value is calculated by subtracting the Base Year Employment estimate from the Projected Year Employment estimate, then dividing by the number of years in the projection period. (PROJOCST-ESTOCCST/No. years.) Warning: this formula may need to be modified depending on the projection time span.
11. aopenr	numeric(9)		A value representing the annual average openings due to replacement. The value is calculated by dividing the total openings due to replacements (in the projection period) by the number of years in the Projection Period.
12. aopent	numeric(9)		A value representing the total annual average openings.
13. growcode	char(2)	3	A descriptor to allow for state specific interpretation of the industry or occupation.
14. suppress	char(1)		An indicator that the record contains confidential data that must be suppressed for public use: 0 = Not Suppressed; 1 = Suppressed

**Constraint Information**

1. Foreign Key (stoccprj.stfips, stoccprj.areatype, stoccprj.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (stoccprj.stfips, stoccprj.matoccode, stoccprj.periodid) references (occdir.stfips, occdir.matoccode, occdir.periodid)
3. Foreign Key (stoccprj.stfips, stoccprj.growcode) references (growcode.stfips, growcode.growcode)

**supply**

Completer data for all occupational training providers in the state.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3, 5, 6	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
7. insttype	char(2)	Primary Key 3	Identifies the type of training institution (WIA Provider, vocational center, community college, university).
8. instown	char(1)	Primary Key 4	Institution ownership code.
9. codetype	char(2)	Primary Key 6	Code describing the type of occupation or training code.
10. code	char(10)	Primary Key 6	The classification code used by the state for this data element. This code could be DOT, OES, CIP, Cluster, SOC, Census, etc. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
11. compltype	char(2)	Primary Key 5	A 2-digit code representing type of program completer. (e.g. Completers with Associates Degree are coded as 03)
12. completers	numeric(8)		Number of program completers.

**Constraint Information**

1. Foreign Key (supply.stfips, supply.areatype, supply.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (supply.periodyear, supply.periodtype, supply.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (supply.stfips, supply.insttype) references (insttype.stfips, insttype.insttype)
4. Foreign Key (supply.instown) references (instown.instown)
5. Foreign Key (supply.stfips, supply.compltype) references (compltyp.stfips, compltyp.compltype)
6. Foreign Key (supply.stfips, supply.codetype, supply.code) references (occcodes.stfips, occcodes.codetype, occcodes.code)

<b>tax</b>			
Revenues from taxes.			
<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.).
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
7. taxtype	char(2)	Primary Key 3	A 2-digit code identifying type of tax.
8. taxrevenue	numeric(15)		Tax revenues.

<b>Constraint Information</b>			
1. Foreign Key (tax.stfips, tax.areatype, tax.area) references (geog.stfips, geog.areatype, geog.area) 2. Foreign Key (tax.periodyear, tax.periodtype, tax.period) references (period.periodyear, period.periodtype, period.period) 3. Foreign Key (tax.stfips, tax.taxtype) references (taxtype.stfips, taxtype.taxtype)			

**uiclaims**

Table of the numbers of Unemployment Insurance Claims by geographic area.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3, 4, 5	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.).
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
7. claimtype	char(1)	Primary Key	Code describing the type of claim: 1 = Initial; 2 = Continued; 9 = Unknown
8. occodetype	char(2)	Primary Key 3	Code describing the type of occupational code.
9. occcode	char(10)	Primary Key 3	The occupational classification code used by the state for this data element. This code could be DOT, OES, SOC, Census, etc. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
10. indcdty	char(2)	Primary Key 4	Code describing the type of industry classification code.
11. indcode	char(6)	Primary Key 4	The industry classification code used by the state for this data element. This code could be SIC or NAICS. For codes not 6 characters long, left justify and blank (ASCII 32) fill.
12. agegroup	char(2)	Primary Key 5	Code identifying the age group.
13. raceethn	char(5)	Primary Key 6	Code indicating ethnicity and race of claimants.
14. gender	char(1)	Primary Key 7	Gender code.
15. claimants	numeric(8)		Number of UI claimants.
16. duration	numeric(4,1)		Average number of weeks of current unemployment.

**Constraint Information**

1. Foreign Key (uiclaims.stfips, uiclaims.areatype, uiclaims.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (uiclaims.periodyear, uiclaims.periodtype, uiclaims.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (uiclaims.stfips, uiclaims.occodetype, uiclaims.occcode) references (occcodes.stfips, occcodes.codetype, occcodes.code)
4. Foreign Key (uiclaims.stfips, uiclaims.indcdty, uiclaims.indcode) references (indcodes.stfips, indcodes.codetype, indcodes.code)
5. Foreign Key (uiclaims.stfips, uiclaims.agegroup) references (agegroup.stfips, agegroup.agegroup)
6. Foreign Key (uiclaims.raceethn) references (raceethn.raceethn)
7. Foreign Key (uiclaims.gender) references (gender.gender)

url				DEPRECATED in v2.6
Listing of uniform resource locators (URL's).				
Field Name	Type	Constraint	Description	
1. urlid	char(5)	Primary Key	Unique identifier of the uniform resource locator.	
2. url	varchar(200)		Uniform resource locator for the site.	
3. urlname	varchar(100)		Name of uniform resource locator site.	
4. urldesc	varchar(MAX)		Description of uniform resource locator site.	

urllinks				DEPRECATED in v2.6
Listing of areas the URL is associated with.				
Field Name	Type	Constraint	Description	
1. urlid	char(5)	Primary Key 2	Unique identifier of the uniform resource locator.	
2. stfips	char(2)	Primary Key 1, 3	State FIPS code.	
3. areatype	char(2)	1	Code describing type of geographic area: e.g. county, service delivery area, MSA.	
4. area	char(6)	1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.	
5. urltopic	char(3)	3	Uniform resource locator topic for the site.	

Constraint Information
1. Foreign Key (urllinks.stfips, urllinks.areatype, urllinks.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (urllinks.urlid) references (url.urlid)
3. Foreign Key (urllinks.stfips, urllinks.urltopic) references (urltopic.stfips, urltopic.urltopic)

wage				DEPRECATED in v2.6
Wage data by occupation, from any source, including OES.				
Field Name	Type	Constraint	Description	
1. stfips	char(2)	Primary Key 1, 3, 4, 5, 7, 8	State FIPS code.	
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area : e.g. county, service delivery area, MSA.	
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.	
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).	
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.).	
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.	
7. indcdty	char(2)	Primary Key 3	Code describing the industry code type.	
8. indcode	char(6)	Primary Key 3	A code used in the classification of establishments by type of activity in which they are engaged. For codes not 6 characters long, left justify and blank (ASCII 32) fill. Either SIC or NAICS code can be used. A siccode of 9999 means non-classifiable; industry not specified.	
9. occcdotype	char(2)	Primary Key 4	Code describing the type of occupational code.	
10. occcode	char(10)	Primary Key 4	The occupational classification code used by the state for this data element. This code could be DOT, OES, SOC, CENSUS, etc. For codes not 10 characters long, left justify and blank (ASCII 32) fill.	
11. wagesource	char(1)	Primary Key 5	A code representing the source of wage data.	
12. ratetype	char(1)	Primary Key 6	Code which identifies the type of wage rate.	
13. leveltype	char(1)	Primary Key 7	The code identifying the type of wage level.	
14. stattype	char(2)	Primary Key 8	Statistical Type identifies the statistical measurement of the occupational wage.	
15. wage	numeric(9,2)		A numerical value representing the wage paid for an occupation.	
16. respondent	numeric(6)		Number of respondents that data were collected from.	
17. empcount	numeric(7)		Total employment.	
Constraint Information				
1. Foreign Key (wage.stfips, wage.areatype, wage.area) references (geog.stfips, geog.areatype, geog.area)				
2. Foreign Key (wage.periodyear, wage.periodtype, wage.period) references (period.periodyear, period.periodtype, period.period)				
3. Foreign Key (wage.stfips, wage.indcdty, wage.indcode) references (indcodes.stfips, indcodes.codetype, indcodes.code)				
4. Foreign Key (wage.stfips, wage.occcdotype, wage.occcode) references (occcodes.stfips, occcodes.codetype, occcodes.code)				
5. Foreign Key (wage.stfips, wage.wagesource) references (wgsource.stfips, wgsource.wagesource)				
6. Foreign Key (wage.ratetype) references (ratetype.ratetype)				
7. Foreign Key (wage.stfips, wage.leveltype) references (leveltyp.stfips, leveltyp.leveltype)				
8. Foreign Key (wage.stfips, wage.stattype) references (stattype.stfips, stattype.stattype)				

**workstop****DEPRECATED in v2.8**

Table of data on work stoppages (strikes or lock-outs).

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3, 4	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code. Will be set to '00' where periodtype is annual.
7. indcody	char(2)	Primary Key 3	Code describing the type of industry code.
8. indcode	char(6)	Primary Key 3	The industry classification code used by the state for this data element. This code could be SIC or NAICS. For codes not 6 characters long, left justify and blank (ASCII 32) fill.
9. ownership	char(2)	Primary Key 4	Ownership is a 2-digit indicator that identifies the employer by public or private ownership. The second digit is for state use.
10. stopstatus	char(1)	Primary Key	Describes whether the work stoppage is new or continuing: '1' = new; '2' = ongoing
11. firms	numeric(4)		The number of companies in which work stoppage occurs.
12. workers	numeric(10)		The number of workers involved in the stoppage.
13. daysidle	numeric(6)		Estimated days that workers involved in stoppage have been idle (working time lost).

**Constraint Information**

1. Foreign Key (workstop.stfips, workstop.areatype, workstop.area) references (geog.stfips, geog.areatype, geog.area)
2. Foreign Key (workstop.periodyear, workstop.periodtype, workstop.period) references (period.periodyear, period.periodtype, period.period)
3. Foreign Key (workstop.stfips, workstop.indcody, workstop.indcode) references (indcodes.stfips, indcodes.codetype, indcodes.code)
4. Foreign Key (workstop.stfips, workstop.ownership) references (ownership.stfips, ownership.ownership)

## Crosswalk Tables

cidsxcip				DEPRECATED in v2.6
Mapping between Career Information Delivery System codes and Classification of Instructional Program codes.				
Field Name	Type	Constraint	Description	
1. stfips	char(2)	Primary Key 1	State FIPS code	
2. codetype	char(2)	Primary Key 1	Code describing the Classification of Instructional Program code type.	
3. code	char(10)	Primary Key 1	A 10-digit code assigned to the Classification of Instructional Programs (CIP) program title.	
4. cidscode	char(9)	Primary Key 2	A 9-digit code assigned to the Career Information Delivery System occupational title.	
Constraint Information				
1. Foreign Key (cidsxcip.stfips, cidsxcip.codetype, cidsxcip.code) references (occodes.stfips, occcodes.codetype, occcodes.code)				
2. Foreign Key (cidsxcip.cidscode) references (cidscode.cidscode)				

clsxproj			
Occupation codes by Cluster, and the percentage of that occupation code's employment within each Cluster.			
Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1, 2, 3	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. cluscode	char(10)	Primary Key 2	Code assigned to the cluster from the State Units of Analysis.
5. occodetype	char(2)	Primary Key 3	Code describing the occupational code.
6. occcode	char(10)	Primary Key 3	The occupational classification code used by the state for this data element. This code could be DOT, OES, SOC, Census, etc. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
7. alloc	numeric(5,2)		Percentage of the occupation code's employment that can be attributed to this Cluster.
Constraint Information			
1. Foreign Key (clsxproj.stfips, clsxproj.areatype, clsxproj.area) references (geog.stfips, geog.areatype, geog.area)			
2. Foreign Key (clsxproj.stfips, clsxproj.cluscode) references (cluscode.stfips, cluscode.cluscode)			
3. Foreign Key (clsxproj.stfips, clsxproj.occodetype, clsxproj.occcode) references (occodes.stfips, occodes.codetype, occodes.code)			

**clsxsupl**

Training program codes and completer types from that training program that have been assigned to a Cluster.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 2, 3, 5	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 4	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 4	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 4	Period Code. Will be set to '00' where periodtype is annual.
7. cluscode	char(10)	Primary Key 2	Code assigned to the cluster from the State Units of Analysis.
8. codetype	char(2)	Primary Key 5	Code describing the type of occupation or training code.
9. code	char(10)	Primary Key 5	The classification code used by the state for this data element. This code could be DOT, OES, CIP, Cluster, SOC, Census, etc. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
10. compltype	char(2)	Primary Key 3	A 2-digit code representing the type of program completer.
<b>Constraint Information</b>			
1. Foreign Key (clsxsupl.stfips, clsxsupl.areatype, clsxsupl.area) references (geog.stfips, geog.areatype, geog.area)			
2. Foreign Key (clsxsupl.stfips, clsxsupl.cluscode) references (cluscode.stfips, cluscode.cluscode)			
3. Foreign Key (clsxsupl.stfips, clsxsupl.compltype) references (compltyp.stfips, compltyp.compltype)			
4. Foreign Key (clsxsupl.periodyear, clsxsupl.periodtype, clsxsupl.period) references (period.periodyear, period.periodtype, period.period)			
5. Foreign Key (clsxsupl.stfips, clsxsupl.codetype, clsxsupl.code) references (occodes.stfips, occodes.codetype, occodes.code)			

**clusxcip****DEPRECATED in v2.7**

Mapping between Department of Education Career Clusters and the Classification of Instructional Programs (CIP).

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS code
2. codetype	char(2)	Primary Key 1	Code describing the Classification of Instructional Program codetype.
3. code	char(10)	Primary Key 1	CIP code
4. clustercode	char(2)	Primary Key 2	Career Cluster code
<b>Constraint Information</b>			
1. Foreign Key (clusxcip.stfips, clusxcip.codetype, clusxcip.code) references (occodes.stfips, occodes.codetype, occodes.code)			
2. Foreign Key (clusxcip.clustercode) references (careerclust.clustercode)			

**clusxpath****DEPRECATED in v2.7**

Mapping between Department of Education Career Clusters and Career Pathways.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. clustercode	char(2)	Primary Key 1	Career Cluster code
2. pathcode	char(4)	Primary Key 2	Career Pathway code
<b>Constraint Information</b>			
1. Foreign Key (clusxpath.clustercode) references (careerclust.clustercode) 2. Foreign Key (clusxpath.pathcode) references (careerpaths.pathcode)			

**clusxsoc****DEPRECATED in v2.7**

Mapping of Department of Education Career Clusters and the Standard Occupational Classification (SOC).

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS code.
2. codetype	char(2)	Primary Key 1	Code describing the Standard Occupational Classification codetype.
3. code	char(10)	Primary Key 1	SOC code
4. clustercode	char(2)	Primary Key 2	Career Cluster code
<b>Constraint Information</b>			
1. Foreign Key (clusxsoc.stfips, clusxsoc.codetype, clusxsoc.code) references (occodes.stfips, occodes.codetype, occodes.code) 2. Foreign Key (clusxsoc.clustercode) references (careerclust.clustercode)			

**dotxcip****DEPRECATED in v2.6**

Mapping of DOT (occupation) to CIP (training program).

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. dotcode	char(9)	Primary Key 1	A 9-digit code assigned to the Dictionary of Occupational Titles (DOT) occupational title.
2. cipcode	char(10)	Primary Key 2	A 10-digit code assigned to the Classification of Instructional Programs (CIP) program title.
3. cipcodetype	char(2)	Primary Key 2	Code describing the CIP version
<b>Constraint Information</b>			
1. Foreign Key (dotxcip.dotcode) references (dotcode.dotcode) 2. Foreign Key (dotxcip.cipcode, dotxcip.cipcodetype) references (cipcode.cipcode, cipcode.codetype)			

**dotxonet****DEPRECATED in v2.6**

Relationship between DOT and O\*NET occupations.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. dotcode	char(9)	Primary Key 1	A 9-digit code assigned to the Dictionary of Occupational Titles (DOT) occupational title.
2. onetcode	char(8)	Primary Key 2	A 6 or 8-digit code* assigned to the Occupational Information Network (O*NET) occupational title. For codes not 8 characters long, left justify and blank (ASCII 32) fill.

**Constraint Information**

1. Foreign Key (dotxonet.dotcode) references (dotcode.dotcode)
2. Foreign Key (dotxonet.onetcode) references (onetcode.onetcode)

**eeo1xcens****DEPRECATED in v2.6**

Mapping of Equal Employment Opportunity (EEO) 1 categories to 2000 census codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. eeo1cat	char(2)	Primary Key 1	A 2-digit code assigned to EEO-1 Job Categories
2. censcode	char(4)	Primary Key 2	A 4-digit code assigned to the Census occupational title
3. cencodetype	char(2)	Primary Key 2	Code describing the Census occupations version

**Constraint Information**

1. Foreign Key (eeo1xcens.eeo1cat) references (eeo1cat.eeo1cat)
2. Foreign Key (eeo1xcens.censcode, eeo1xcens.cencodetype) references (censcode.censcode, censcode.codetype)

**eeosxcens****DEPRECATED in v2.6**

Mapping between Equal Employment Opportunity (EEO) state and local categories to 2000 census code relationship.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. eeostloc	char(2)	Primary Key 1	A 2-digit code assigned to EEO State and Local Job Categories
2. censcode	char(4)	Primary Key 2	A 4-digit code assigned to the Census occupational title
3. cencodetype	char(2)	Primary Key 2	Code describing the version of the Census occupational code

**Constraint Information**

1. Foreign Key (eeosxcens.eeostloc) references (eeostloc.eeostoc)
2. Foreign Key (eeosxcens.censcode, eeosxcens.cencodetype) references (censcode.censcode, censcode.codetype)

**indxind**

Table mapping indcodes and codetypes to related indcodes and codetypes

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 2	State FIPS code
2. codetype	char(2)	Primary Key 1	Code describing the type of industry classification code.
3. code	char(6)	Primary Key 1	The classification codes used by the state for this data element. This could be SIC, NAICS, or other industry code.
4. codetype2	char(2)	Primary Key 2	Code describing the type of industry classification code.
5. code2	char(6)	Primary Key 2	The classification codes used by the state for this data element. This could be SIC, NAICS, or other industry code.

**Constraint Information**

1. Foreign Key (indxind.stfips, indxind.codetype, indxind.code) references (indcodes.stfips, indcodes.codetype, indcodes.code)
2. Foreign Key (indxind.stfips, indxind.codetype2, indxind.code2) references (indcodes.stfips, indcodes.codetype, indcodes.code)

**laytxocc**

Table of lay titles and the associated occupation codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS code.
2. occodetype	char(2)	Primary Key 1	Code describing the occupational code.
3. occcode	char(10)	Primary Key 1	The occupational classification code used by the state for this data element. This code could be DOT, OES, SOC, Census, etc. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
4. laytlcode	char(5)	Primary Key 2	Code associated with a particular lay title.

**Constraint Information**

1. Foreign Key (laytxocc.stfips, laytxocc.occodetype, laytxocc.occcode) references (occcodes.stfips, occcodes.codetype, occcodes.code)
2. Foreign Key (laytxocc.laytlcode) references (laytitle.laytlcode)

**licxocc**

Table mapping state licenses to associated occupations.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 2, 3	State FIPS code.
2. licenseid	char(10)	Primary Key 2	A code that identifies the license for the specific occupational title.
3. occodetype	char(2)	Primary Key 3	Code for Occupation code type.
4. occcode	char(10)	Primary Key 3	Occupation code.

**Constraint Information**

1. Foreign Key (licxocc.stfips) references (stfipstb.stfips)
2. Foreign Key (licxocc.stfips, licxocc.licenseid) references (license.stfips, license.licenseid)
3. Foreign Key (licxocc.stfips, licxocc.occodetype, licxocc.occcode) references (occcodes.stfips, occcodes.codetype, occcodes.code)

**matxind**

This table crosswalks the MicroMatrix industry codes to other industry codes, such as NAICS or SIC.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 2, 3	State FIPS code.
2. matincode	char(15)	Primary Key 1	Industry matrix code from Micro Matrix.
3. periodid	char(2)	Primary Key 1	A 2-digit code identifying the type of period used.
4. indcodetype	char(2)	Primary Key 2	Code describing the type of industry classification code.
5. indcode	char(6)	Primary Key 2	The classification code used by the state for this data element. This could be a SIC or NAICS code.
6. subtot	char(1)	3	Sum level of the information.

**Constraint Information**

1. Foreign Key (matxind.stfips, matxind.matincode, matxind.periodid) references (inddir.stfips, inddir.matincode, inddir.periodid)
2. Foreign Key (matxind.stfips, matxind.indcodetype, matxind.indcode) references (indcodes.stfips, indcodes.codetype, indcodes.code)
3. Foreign Key (matxind.stfips, matxind.subtot) references (indsub.stfips, indsub.subtot)

**matxnaic****DEPRECATED in v2.6**

This table crosswalks MicroMatrix industry codes to NAICS codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 3	State FIPS code.
2. matincode	char(15)	Primary Key 1	Industry matrix code from Micro Matrix.
3. periodid	char(2)	Primary Key 1	A 2-digit code identifying the type of period used.
4. naicscode	char(6)	Primary Key 2	A 6-digit code used in the North American Industry Classification System (NAICS).
5. subtot	char(1)	3	Sum level of the information.

**Constraint Information**

1. Foreign Key (matxnaic.stfips, matxnaic.matincode, matxnaic.periodid) references (inddir.stfips, inddir.matincode, inddir.periodid)
2. Foreign Key (matxnaic.naicscode) references (naiccode.naicscode)
3. Foreign Key (matxnaic.stfips, matxnaic.subtot) references (indsub.stfips, indsub.subtot)

## matxocc

This table crosswalks MicroMatrix occupation codes to other occupation codes, such as SOC or OES.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1, 2, 3	State FIPS code.
2. matocode	char(10)	Primary Key 1	Occupation matrix code from Micro Matrix. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
3. periodid	char(2)	Primary Key 1	A 2-digit code identifying the type of period used.
4. occodetype	char(2)	Primary Key 2	Code describing the type of occupation or training classification code.
5. occcode	char(10)	Primary Key 2	The classification code used by the state for this data element.
6. subtot	char(1)	3	Sum level of the information.

### Constraint Information

1. Foreign Key (matxocc.stfips, matxocc.matocode, matxocc.periodid) references (occdir.stfips, occdir.matocode, occdir.periodid)
2. Foreign Key (matxocc.stfips, matxocc.occodetype, matxocc.occcode) references (occcodes.stfips, occcodes.codetype, occcodes.code)
3. Foreign Key (matxocc.stfips, matxocc.subtot) references (occsub.stfips, occsub.subtot)

## matxoes

### DEPRECATED in v2.6

This table crosswalks MicroMatrix occupation codes to OES codes.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1, 3	State FIPS code.
2. matocode	char(10)	Primary Key 1	Occupation matrix code from Micro Matrix. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
3. periodid	char(2)	Primary Key 1	A 2-digit code identifying the type of period used.
4. oescode	char(5)	Primary Key 2	A 5-digit code assigned to the Occupation Employment Statistics (OES) occupational title.
5. subtot	char(1)	3	Sum level of the information.

### Constraint Information

1. Foreign Key (matxoes.stfips, matxoes.matocode, matxoes.periodid) references (occdir.stfips, occdir.matocode, occdir.periodid)
2. Foreign Key (matxoes.oescode) references (oescode.oescode)
3. Foreign Key (matxoes.stfips, matxoes.subtot) references (occsub.stfips, occsub.subtot)

<b>matxsic</b>				<b>DEPRECATED in v2.6</b>
This table crosswalks MicroMatrix industry codes to SIC codes.				
Field Name	Type	Constraint	Description	
1. stfips	char(2)	Primary Key 1, 3	State FIPS code.	
2. matincode	char(15)	Primary Key 1	Industry matrix code from Micro Matrix.	
3. periodid	char(2)	Primary Key 1	A 2-digit code identifying the type of period used.	
4. siccode	char(4)	Primary Key 2	A code used in the classification of establishments by type of activity in which they are engaged. This field is left justified and padded with zeroes. A siccode of 9999 means non-classifiable; industry not specified.	
5. subtot	char(1)	3	Sum level of the information.	
<b>Constraint Information</b>				
1. Foreign Key (matxsic.stfips, matxsic.matincode, matxsic.periodid) references (inddir.stfips, inddir.matincode, inddir.periodid) 2. Foreign Key (matxsic.siccode) references (siccode.siccode) 3. Foreign Key (matxsic.stfips, matxsic.subtot) references (indsub.stfips, indsub.subtot)				

<b>matxsoc</b>				<b>DEPRECATED in v2.6</b>
This table crosswalks MicroMatrix occupation codes to SOC codes.				
Field Name	Type	Constraint	Description	
1. stfips	char(2)	Primary Key 1, 3	State FIPS code.	
2. matoccode	char(10)	Primary Key 1	Occupation matrix code from Micro Matrix. For codes not 10 characters long, left justify and blank (ASCII 32) fill.	
3. periodid	char(2)	Primary Key 1	A 2-digit code identifying the type of period used.	
4. soccode	char(6)	Primary Key 2	A six-digit code assigned to a current series Standard Occupational Classification (SOC) occupational title.	
5. soccodetype	char(2)	Primary Key 2	Code describing the version of SOC used.	
6. subtot	char(1)	3	Sum level of the information.	
<b>Constraint Information</b>				
1. Foreign Key (matxsoc.stfips, matxsoc.matoccode, matxsoc.periodid) references (occdir.stfips, occdir.matoccode, occdir.periodid) 2. Foreign Key (matxsoc.soccode, matxsoc.soccodetype) references (soccode.soccode, soccode.soccodetype) 3. Foreign Key (matxsoc.stfips, matxsoc.subtot) references (occsub.stfips, occsub.subtot)				

<b>mocxocc</b>				<b>New Table in v2.8</b>
Table mapping Military Occupational Classification (MOC) to Standard Occupational Classification (SOC).				
<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>	
1. stfips	char(2)	Primary Key 1	State FIPS code	
2. codetype	char(2)	Primary Key 1	Code describing the Standard Occupational Classification codetype.	
3. code	char(10)	Primary Key 1	A 6-digit code assigned to the Standard Occupational Classification (SOC) occupational title.	
4. svc	char(1)	Primary Key 2	Service Branch.	
5. mpc	char(1)	Primary Key 2	Military Personnel Category.	
6. status	char(1)	Primary Key 2	Military Occupation Status: A = Active occupation; O = Obsolete occupation	
7. moccoode	char(10)	Primary Key 2	A 10-digit Military Occupational Classification.	

**Constraint Information**

1. Foreign Key (mocxocc.stfips, mocxocc.codetype, mocxocc.code) references (occodes.stfips, occcodes.codetype, occcodes.code)
2. Foreign Key (mocxocc.svc, mocxocc.mpc, mocxocc.status, mocxocc.moccoode) references (moccoode.svc, moccoode.mpc, moccoode.status, moccoode.moccoode)

<b>occxocc</b>			
Table mapping occupation codes and codetypes to related occupation codes and codetypes			
<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 2	State FIPS code
2. codetype	char(2)	Primary Key 1	Code describing the type of occupation or training classification code.
3. code	char(10)	Primary Key 1	The classification code used by the state for this data element. This code could be a CIP, DOT, SOC, or other occupational code.
4. codetype2	char(2)	Primary Key 2	Code describing the type of occupation or training classification code.
5. code2	char(10)	Primary Key 2	The classification code used by the state for this data element. This code could be a CIP, DOT, SOC, or other occupational code.

**Constraint Information**

1. Foreign Key (occxocc.stfips, occxocc.codetype, occxocc.code) references (occodes.stfips, occcodes.codetype, occcodes.code)
2. Foreign Key (occxocc.stfips, occxocc.codetype2, occxocc.code2) references (occodes.stfips, occcodes.codetype, occcodes.code)

<b>oesxcens</b>				<b>DEPRECATED in v2.6</b>
Table mapping OES codes to Census codes.				
Field Name	Type	Constraint	Description	
1. oescode	char(5)	Primary Key 1	A 5-digit code assigned to the Occupational Employment Statistics (OES) occupational title.	
2. censcode	char(4)	Primary Key 2	A 4-digit code assigned to the Census occupational title.	
3. codetype	char(2)	Primary Key 2	Code describing the version of Census occupations	
<b>Constraint Information</b>				
1. Foreign Key (oesxcens.oescode) references (oescode.oescode)				
2. Foreign Key (oesxcens.censcode, oesxcens.codetype) references (censcode.censcode, censcode.codetype)				

<b>oesxcids</b>				<b>DEPRECATED in v2.6</b>
Table mapping the OES-to-CIDS relationship.				
Field Name	Type	Constraint	Description	
1. oescode	char(5)	Primary Key 1	A 5-digit code assigned to the Occupational Employment Statistics (OES) occupational title.	
2. cidscode	char(9)	Primary Key 2	A 9-digit code assigned to the Career Information Delivery System occupational title.	
<b>Constraint Information</b>				
1. Foreign Key (oesxcids.oescode) references (oescode.oescode)				
2. Foreign Key (oesxcids.cidscode) references (cidscode.cidscode)				

<b>oesxcip</b>				<b>DEPRECATED in v2.6</b>
Table mapping OES codes to CIP codes.				
Field Name	Type	Constraint	Description	
1. oescode	char(5)	Primary Key 1	A 5-digit code assigned to the Occupational Employment Statistics (OES) occupational title.	
2. cipcode	char(10)	Primary Key 2	A 10-digit code assigned to a Classification of Instructional Programs (CIP) program title.	
3. cipcodetype	char(2)	Primary Key 2	Code describing the CIP version	
<b>Constraint Information</b>				
1. Foreign Key (oesxcip.oescode) references (oescode.oescode)				
2. Foreign Key (oesxcip.cipcode, oesxcip.cipcodetype) references (cipcode.cipcode, cipcode.cipcodetype)				

<b>oesxdot</b>				<b>DEPRECATED in v2.6</b>
Table mapping OES codes to DOT codes.				
Field Name	Type	Constraint	Description	
1. oescode	char(5)	Primary Key 1	A 5-digit code assigned to the Occupational Employment Statistics (OES) occupational title.	
2. dotcode	char(9)	Primary Key 2	A 9-digit code assigned to a Dictionary of Occupational Titles (DOT) occupational title.	
<b>Constraint Information</b>				
1. Foreign Key (oesxdot.oescode) references (oescode.oescode)				
2. Foreign Key (oesxdot.dotcode) references (dotcode.dotcode)				

<b>oesxjob</b>				<b>DEPRECATED in v2.6</b>
Mapping of OES codes to Job Family codes.				
Field Name	Type	Constraint	Description	
1. oescode	char(5)	Primary Key 1	A 5-digit code assigned to the Occupational Employment Statistics (OES) occupational title.	
2. jobfamily	char(2)	Primary Key 2	Job Family code.	
<b>Constraint Information</b>				
1. Foreign Key (oesxjob.oescode) references (oescode.oescode) 2. Foreign Key (oesxjob.jobfamily) references (jobfamly.jobfamily)				

<b>oesxonet</b>				<b>DEPRECATED in v2.6</b>
Table mapping OES codes to O*NET codes.				
Field Name	Type	Constraint	Description	
1. oescode	char(5)	Primary Key 1	A 5-digit code assigned to the Occupational Employment Statistics (OES) occupational title.	
2. onetcode	char(8)	Primary Key 2	A 6 or 8-digit code* assigned to the Occupational Information Network (O*NET) occupational title. For codes not 8 characters long, left justify and blank (ASCII 32) fill.	
<b>Constraint Information</b>				
1. Foreign Key (oesxonet.oescode) references (oescode.oescode) 2. Foreign Key (oesxonet.onetcode) references (onetcode.onetcode)				
<b>Table Notes</b>				
1: Length of onetcode depends on which version of O*NET codes you are using.				

<b>oesxsoc</b>				<b>DEPRECATED in v2.6</b>
Table mapping OES codes to SOC codes.				
Field Name	Type	Constraint	Description	
1. oescode	char(5)	Primary Key 1	A 5-digit code assigned to the Occupational Employment Statistics (OES) occupational title.	
2. soccode	char(6)	Primary Key 2	A 6-digit code assigned to a Standard Occupational Classification (SOC) occupational title.	
3. soccodetype	char(2)	Primary Key 2	Code describing the SOC version	
<b>Constraint Information</b>				
1. Foreign Key (oesxsoc.oescode) references (oescode.oescode) 2. Foreign Key (oesxsoc.soccode, oesxsoc.soccodetype) references (soccode.soccode, soccode.soccodetype)				

**sicxnaic****DEPRECATED in v2.6**

Table of SIC-to-NAICS code relationships.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. siccode	char(4)	Primary Key 1	A code used in the classification of establishments by type of activity in which they are engaged. This field is left justified and padded with zeroes. A siccode of 9999 means non-classifiable; industry not specified.
2. naicscode	char(6)	Primary Key 2	A code used in the North American Industry Classification System (NAICS).
<b>Constraint Information</b>			
1. Foreign Key (sicxnaic.siccode) references (siccode.siccode) 2. Foreign Key (sicxnaic.naicscode) references (naiccode.naicscode)			

**socxcens****DEPRECATED in v2.6**

Table mapping SOC codes to Census codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS code
2. codetype	char(2)	Primary Key 1	Code describing the Standard Occupational Classification system used.
3. code	char(10)	Primary Key 1	A 6-digit code assigned to the Standard Occupational Classification (SOC) occupational title.
4. censcode	char(4)	Primary Key 2	A 4-digit code assigned to the Census occupational title.
5. censcodetype	char(2)	Primary Key 2	Code describing the version of Sensus occupational codes
<b>Constraint Information</b>			
1. Foreign Key (socxcens.stfips, socxcens.codetype, socxcens.code) references (occodes.stfips, occcodes.codetype, occcodes.code) 2. Foreign Key (socxcens.censcode, socxcens.censcodetype) references (censcode.censcode, censcode.codetype)			

**socxcids****DEPRECATED in v2.6**

Table mapping SOC codes to CIDS codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS code
2. codetype	char(2)	Primary Key 1	Code describing the occupational code.
3. code	char(10)	Primary Key 1	A 6-digit code assigned to the Standard Occupational Classification (SOC) occupational title.
4. cidscode	char(9)	Primary Key 2	A 9-digit code assigned to the Career Information Delivery System occupational title.
<b>Constraint Information</b>			
1. Foreign Key (socxcids.stfips, socxcids.codetype, socxcids.code) references (occodes.stfips, occcodes.codetype, occcodes.code) 2. Foreign Key (socxcids.cidscode) references (cidscode.cidscode)			

**socxcip****DEPRECATED in v2.6**

Table mapping SOC codes to CIP codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS code
2. codetype	char(2)	Primary Key 1	Code describing the occupational code.
3. code	char(10)	Primary Key 1	A 6-digit code assigned to the Standard Occupational Classification (SOC) occupational title.
4. cipcode	char(10)	Primary Key 2	A 10-digit code assigned to a Classification of Instructional Programs (CIP) program title.
5. cipcodetype	char(2)	Primary Key 2	Code describing the version of CIP

**Constraint Information**

1. Foreign Key (socxcip.stfips, socxcip.codetype, socxcip.code) references (occodes.stfips, occcodes.codetype, occcodes.code)
2. Foreign Key (socxcip.cipcode, socxcip.cipcodetype) references (cipcode.cipcode, cipcode.cipcodetype)

**socxdot****DEPRECATED in v2.6**

Table mapping SOC codes to DOT codes.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. soccode	char(6)	Primary Key 1	A 6-digit code assigned to the Standard Occupational Classification (SOC) occupational title.
2. soccodetype	char(2)	Primary Key 1	Code describing the SOC version
3. dotcode	char(9)	Primary Key 2	A 9-digit code assigned to a Dictionary of Occupational Titles (DOT) occupational title.

**Constraint Information**

1. Foreign Key (socxdot.soccode, socxdot.soccodetype) references (soccode.soccode, soccode.soccodetype)
2. Foreign Key (socxdot.dotcode) references (dotcode.dotcode)

**socxjob****DEPRECATED in v2.6**

Table mapping SOC codes to Job Families.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. soccode	char(6)	Primary Key 1	A 6-digit code assigned to the Standard Occupational Classification (SOC) occupational title.
2. soccodetype	char(2)	Primary Key 1	Code describing the SOC version
3. jobfamily	char(2)	Primary Key 2	Job Family code.

**Constraint Information**

1. Foreign Key (socxjob.soccode, socxjob.soccodetype) references (soccode.soccode, soccode.soccodetype)
2. Foreign Key (socxjob.jobfamily) references (jobfamly.jobfamily)

<b>socxonet</b>				<b>DEPRECATED in v2.6</b>
Table mapping SOC codes to O*NET codes.				
<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>	
1. stfips	char(2)	Primary Key 1	State FIPS code	
2. codetype	char(2)	Primary Key 1	Code describing the occupational code.	
3. code	char(10)	Primary Key 1	A 6-digit code assigned to the Standard Occupational Classification (SOC) occupational title.	
4. onetcode	char(8)	Primary Key 2	A 6 or 8-digit code (length of code depends on which version of O*NET codes you are using) assigned to the Occupational Information Network (O*NET) occupational title. For codes not 8 characters long, left justify and blank (ASCII 32) fill.	

<b>Constraint Information</b>
1. Foreign Key (socxonet.stfips, socxonet.codetype, socxonet.code) references (occodes.stfips, occcodes.codetype, occcodes.code)
2. Foreign Key (socxonet.onetcode) references (onetcode.onetcode)

<b>Table Notes</b>
1: Length of onetcode depends on which version of O*NET codes you are using.

## Administrative Tables

datasess				DEPRECATED in v2.8
This table contains a list of "data sessions" or "reports" corresponding to a particular application.				
Field Name	Type	Constraint	Description	
1. appl	char(8)	Primary Key	Application name or identifier.	
2. session	varchar(32)	Primary Key	Data session name or report name.	
3. sessdesc	varchar(60)		Description of data session or report.	
4. suppavail	char(1)		Does suppress field exist? yes/no - this may be a bit field in some rdbms. 0 = No; 1 = Yes	

empdbinf				
This table contains information about the current installed version of the empdb file.				
Field Name	Type	Constraint	Description	
1. releaseno	char(3)	Primary Key	Empdb release number.	
2. releasemo	char(2)		Release month.	
3. releaseyr	char(4)		Release year.	
4. copyrtyear	char(4)		Copyright year.	
5. contractyr	char(4)		Contract year.	
6. editionyr	char(4)		Edition year.	

indcodes				Revised in v2.8	
Master table of industry code type/code combinations, allowing multiple classification systems to be used.					
Field Name	Type	Constraint	Description		
1. stfips	char(2)	Primary Key 1	State FIPS Code.		
2. codetype	char(2)	Primary Key 2	Code describing the type of industry classification code.		
3. code	char(6)	Primary Key	The classification code used by the state for this data element. This could be a SIC or NAICS code. For codes not 6 characters long, left justify and blank (ASCII 32) fill.		
4. codetitle	varchar(200)		The descriptive title for this industry code.		
Constraint Information					
1. Foreign Key (indcodes.stfips) references (stfipstb.stfips)					
2. Foreign Key (indcodes.codetype) references (indtypes.codetype)					

**indsum**

Count of employers for each industry, with detailed source.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1, 2	State FIPS Code
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. indcodetyp	char(2)	Primary Key 2	Code describing the type of industry classification code.
5. indcode	char(6)	Primary Key 2	The classification code used by the state for this data element. This could be a SIC or NAICS code. For codes not 6 characters long, left justify and blank (ASCII 32) fill.
6. indsource	char(1)	Primary Key	Detail source of industry aggregates: E = empdb; S = stfirms
7. employers	numeric(6)		Count of employers
<b>Constraint Information</b>			
1. Foreign Key (indsum.stfips, indsum.areatype, indsum.area) references (geog.stfips, geog.areatype, geog.area)			
2. Foreign Key (indsum.stfips, indsum.indcodetyp, indsum.indcode) references (indcodes.stfips, indcodes.codetype, indcodes.code)			

**maplist**

**DEPRECATED in v2.8**

Catalogue of maps and map images.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS code.
2. areatype	char(2)	Primary Key 1	Code describing type of geographic area: e.g. county, service delivery area, MSA.
3. area	char(6)	Primary Key 1	A 6-digit code assigned to represent a geographic area. Front fill with zeroes.
4. periodyear	char(4)	Primary Key 2	Character representation of the calendar year (e.g. 2006).
5. periodtype	char(2)	Primary Key 2	Code describing type of period (e.g. annual, quarterly, monthly, etc.)
6. period	char(2)	Primary Key 2	Period Code.
7. mapname	varchar(32)	Primary Key	Name of map.
8. mapdesc	varchar(60)		Description or title of map.
9. mapimage	long raw		Actual map image data.
<b>Constraint Information</b>			
1. Foreign Key (maplist.stfips, maplist.areatype, maplist.area) references (geog.stfips, geog.areatype, geog.area)			
2. Foreign Key (maplist.periodyear, maplist.periodtype, maplist.period) references (period.periodyear, period.periodtype, period.period)			

**occcodes**

Revised in v2.8

Master table of occupation or training code type/code combination, allowing multiple codes systems to be used.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. codetype	char(2)	Primary Key 2	Code describing the type of occupation or training classification code.
3. code	char(10)	Primary Key	The classification code used by the state for this data element. This could be a CIP, DOT, OES, SOC or other occupational code. For codes not 10 characters long, left justify and blank (ASCII 32) fill.
4. codetitle	varchar(200)		The descriptive title for this occupation or training code.

Constraint Information			
1. Foreign Key (occcodes.stfips) references (stfipstb.stfips)			
2. Foreign Key (occcodes.codetype) references (occtypes.codetype)			

**sesstabl**

DEPRECATED in v2.8

A mapping between an application's reports or data sessions and the WID tables that are used for those reports.

Field Name	Type	Constraint	Description
1. appl	char(8)	Primary Key 1	Application name or identifier.
2. session	varchar(32)	Primary Key 1	Data session name or report name.
3. tablename	varchar(32)	Primary Key 2	Name of Workforce Information table.

Constraint Information			
1. Foreign Key (sesstabl.appl, sesstabl.session) references (datasess.appl, datasess.session)			
2. Foreign Key (sesstabl.tablename) references (tabllist.tablename)			

**source**

DEPRECATED in v2.8

A list of data sessions or reports for a given application and narrative data used to describe the original source of data.

Field Name	Type	Constraint	Description
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. appl	char(8)	Primary Key 2	Application name or identifier.
3. session	varchar(32)	Primary Key 2	Data session name or report name.
4. source	varchar(MAX)		Narrative text describing the original source(s) of data for this data session or report.

Constraint Information

1. Foreign Key (source.stfips) references (stfipstb.stfips)
2. Foreign Key (source.appl, source.session) references (datasess.appl, datasess.session)

**statelst**

List of states for which there is data stored in your WID, used by triggers of lookup tables.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS code.
2. statename	varchar(20)		State name.
3. stateabbrv	char(2)		The two letter state abbreviation.
<b>Constraint Information</b>			
1. Foreign Key (statelst.stfips) references (stfipstb.stfips)			

**tabllist**

This table contains one record for each table in the Workforce Information Database.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. tablename	varchar(32)	Primary Key	Name of Workforce Information table.
2. tabledesc	varchar(60)		Description of table.
3. tabltype	char(1)		A code indicating the type of Workforce Information table.

**tablsrce**

Table describing how and from whom to obtain source data for the WID tables.

<b>Field Name</b>	<b>Type</b>	<b>Constraint</b>	<b>Description</b>
1. stfips	char(2)	Primary Key 1	State FIPS Code.
2. tablename	varchar(32)	Primary Key 2	Name of Workforce Information table.
3. supplier	varchar(60)		Name of department or office.
4. contact	varchar(30)		Individual to contact.
5. telephone	char(10)		Telephone number.
6. teleext	varchar(10)		Telephone extension.
7. lastupdate	date		Date this source data was last updated.
8. nextupdate	date		Date this source data will be updated next.
9. filetype	varchar(10)		File format of source data.
10. info	varchar(MAX)		Narrative text describing any other relevant information regarding this source data.

**Constraint Information**

1. Foreign Key (tablsrce.stfips) references (stfipstb.stfips)
2. Foreign Key (tablsrce.tablename) references (tabllist.tablename)

# Workforce Information Database version 2.8

#### Notes for Suggested Load Order

Table Types: A=Admin; D=Data; L=Look-up; X=Cross-walk

OCCCODES is normally loaded by triggers. If triggers are not used, content for this table should be appended from the related lookup tables: CENSCODE, CIDSCODE, CIPCODE, CLUSCODE, DOTCODE, OCCDIR, OESCODE, ONETCODE, SOCCODE and STPROGCD.

INDCODES is normally loaded by triggers. If triggers are not used, content for this table should be appended from the related lookup tables: CENIND, SICCODE and NAICCODE.

## Appendix B

Workforce Information Database, Version 2.8 - Notes on the Race/Ethnicity codes

The field **raceethn** is a five-character code that identifies the ethnicity and race of an individual or group.

Characters 1-2 = Ethnicity.

Characters 3-4 = Race.

Character 5 = Type.

Type 0 = A total.

Type 1 = A type 1 record represents an unduplicated count of persons, in which individuals are counted as one race alone. Where persons are identified as more than one race, they are included in **one** multiple race group (e.g. 34, 48, 55, 70); thus, are counted in a single race group. Type 1 race subcategories sum to their type 1 totals (e.g. 411 through 481 = 401, 101 + 201 + 301 + 401 + 501 + 601 + 701 + 991 = 001).

Type 2 = A type 2 record exists for each race a person may have identified as part of their racial makeup. A single race person will be represented in one type 2 record. A person whose racial makeup is a combination of two races will be represented in two type 2 records. Because a multi-racial person is counted in more than one type 2 record, the sum of type 2 counts in virtually all instances will exceed the total population.

Examples: 10001 = Not Hispanic, all races

20201 = Hispanic and black (one race reported)

22102 = Mexican and white (race reported alone or in combination with other races)

99701 = Ethnicity unknown, persons of two or more races

00511 = All Native Hawaiians (no reported race combinations), regardless of ethnicity

Ethnicity		Race		Type
00	Total Population	00	Total Population	0,1,2
10	Not Hispanic or Latino	10	White	1,2
20	Hispanic or Latino (All 20-29)	20	Black or African American	1,2

Workforce Information Database, Version 2.8 - Notes on the Race/Ethnicity codes

Ethnicity	Race		Type
	71-89	State use	
	99	Race Unknown	1

## Appendix C

### Workforce Information Database, Version 2.8 - Deprecated Tables

Deprecated tables are tables that are no longer necessary, either because they refer to outdated data or classification systems, or are redundant, or for other reasons no longer fit into the WID. These tables will continue to be supported for the time being, allowing backward compatibility, but should not be used in any new software or system development.

#### Look-up Tables

Table Name	Deprecated in	Reason for deprecating	Replacement table(s)
cenind	2.8		
censcode	2.8		
clusgrad	2.8	lookup table for deprecated table	
disabil	2.8		
disadvan	2.8	lookup table for deprecated table	
dislocat	2.8	lookup table for deprecated table	
dotcode	2.6	Obsolete occupational coding system	soccode and related crosswalks
dwvertyp	2.8	lookup for deprecated table	
eeo1cat	2.6	Developed for Census 2000 EEO data; no longer available.	
eeostloc	2.6	Developed for Census 2000 EEO data; no longer available.	
jobfamly	2.6	Obsolete classification.	
mlssepcat	2.8	discontinued program; no data	
mlssepcd	2.8	discontinued program; no data	
mlssepcdtyp	2.8	discontinued program; no data	
oescode	2.6	Obsolete occupational coding system	soccode and related crosswalks
oesgroup	2.6	Obsolete occupational coding system	soccode and related crosswalks
oeslaytl	2.6	Obsolete occupational coding system	
oestrntm	2.6	Obsolete coding system	education, training
seasonal	2.8	lookup table for deprecated table	
siccode	2.6	Obsolete industry coding system	naicscode and related crosswalks
sicdiv	2.6	Obsolete industry coding system	naicscode and related crosswalks

## Appendix C

### Workforce Information Database, Version 2.8 - Deprecated Tables

Deprecated tables are tables that are no longer necessary, either because they refer to outdated data or classification systems, or are redundant, or for other reasons no longer fit into the WID. These tables will continue to be supported for the time being, allowing backward compatibility, but should not be used in any new software or system development.

#### **Look-up Tables**

Table Name	Deprecated in	Reason for deprecating	Replacement table(s)
siclevel	2.6	Obsolete industry coding system	naicscode and related crosswalks
urltopic	2.6	Lack of use.	
vetcode	2.8	lookup table for deprecated table	

#### **Data Tables**

Table Name	Deprecated in	Reason for deprecating	Replacement table(s)
analysis	2.8	unused, with unclear data source or purpose	
cenlabor	2.8	outdated data source; no longer produced	
develop	2.8	unused, with unclear data source or purpose	
eeolabfac	2.6	Developed for Census 2000 EEO data; no longer available.	
eeolabfor	2.6	Developed for Census 2000 EEO data; no longer available.	
eeoocc	2.6	Developed for Census 2000 EEO data; no longer available.	
eeopop	2.6	Developed for Census 2000 EEO data; no longer available.	
esapplic1	2.8	unused, with unclear data source or purpose	TBD
esapplic2	2.8	unused, with unclear data source or purpose	TBD
indprj	2.6	Redundant table	iomatrix
mls	2.8	discontinued program; no data	
mlsclaim	2.8	discontinued program; no data	
mlsevent	2.8	discontinued program; no data	
occprj	2.6	Redundant table	iomatrix
oeswage	2.6	Redundant table	iowage
propval	2.8	unused, with unclear data source or purpose	

## Appendix C

### Workforce Information Database, Version 2.8 - Deprecated Tables

Deprecated tables are tables that are no longer necessary, either because they refer to outdated data or classification systems, or are redundant, or for other reasons no longer fit into the WID. These tables will continue to be supported for the time being, allowing backward compatibility, but should not be used in any new software or system development.

#### Data Tables

Table Name	Deprecated in	Reason for deprecating	Replacement table(s)
stindprj	2.6	Redundant table	iomatrix
stoccprj	2.6	Redundant table	iomatrix
url	2.6	Lack of use.	
urllinks	2.6	Lack of use.	
wage	2.6	Redundant table	iowage
workstop	2.8	unused, with unclear data source or purpose	

#### Crosswalk Tables

Table Name	Deprecated in	Reason for deprecating	Replacement table(s)
cidsxcip	2.6	Redundant; replace with generic occ to occ table	occxocc
clusxcip	2.7	Redundant; replace with generic occ to occ table	occxocc (non-standard)
clusxpath	2.7	Redundant; replace with generic occ to occ table	occxocc (non-standard)
clusxsoc	2.7	Redundant; replace with generic occ to occ table	occxocc (non-standard)
dotxcip	2.6	Obsolete occupational coding system	soccode and related crosswalks
dotxonet	2.6	Obsolete occupational coding system	soccode and related crosswalks
eeo1xcens	2.6	Developed for Census 2000 EEO data; no longer available.	
eeosxcens	2.6	Developed for Census 2000 EEO data; no longer available.	
matxnaic	2.6	Too specific; see generic table	matxind
matxes	2.6	Obsolete occupational coding system	matxocc
matxsic	2.6	Obsolete industry coding system	matxind
matxsoc	2.6	Too specific; see generic table	matxocc

### Workforce Information Database, Version 2.8 - Deprecated Tables

Deprecated tables are tables that are no longer necessary, either because they refer to outdated data or classification systems, or are redundant, or for other reasons no longer fit into the WID. These tables will continue to be supported for the time being, allowing backward compatibility, but should not be used in any new software or system development.

#### Crosswalk Tables

Table Name	Deprecated in	Reason for deprecating	Replacement table(s)
oesxcens	2.6	Obsolete occupational coding system	soccode and related crosswalks
oesxcids	2.6	Obsolete occupational coding system	soccode and related crosswalks
oesxcip	2.6	Obsolete occupational coding system	soccode and related crosswalks
oesxdot	2.6	Obsolete occupational coding system	soccode and related crosswalks
oesxjob	2.6	Obsolete occupational coding system	soccode and related crosswalks
oesxonet	2.6	Obsolete occupational coding system	soccode and related crosswalks
oesxsoc	2.6	Obsolete occupational coding system	soccode and related crosswalks
sicxnaic	2.6	Obsolete industry coding system	naicscode and related crosswalks
socxcens	2.6	Redundant; replace with generic occ to occ table	occxocc
socxcids	2.6	Redundant; replace with generic occ to occ table	occxocc
socxcip	2.6	Redundant; replace with generic occ to occ table	occxocc
socxdot	2.6	Obsolete occupational coding system	soccode and related crosswalks
socxjob	2.6	Redundant; replace with generic occ to occ table	occxocc
socxonet	2.6	Redundant; replace with generic occ to occ table	occxocc

#### Administrative Tables

Table Name	Deprecated in	Reason for deprecating	Replacement table(s)
datasess	2.8	admin table no longer used	

## Appendix C

### Workforce Information Database, Version 2.8 - Deprecated Tables

Deprecated tables are tables that are no longer necessary, either because they refer to outdated data or classification systems, or are redundant, or for other reasons no longer fit into the WID. These tables will continue to be supported for the time being, allowing backward compatibility, but should not be used in any new software or system development.

#### Administrative Tables

Table Name	Deprecated in	Reason for deprecating	Replacement table(s)
maplist	2.8	unused admin table	
sesstabl	2.8	unused admin table	
source	2.8	unused admin table	

## Appendix D

### Workforce Information Database, Version 2.8 - Changes from Version 2.7

#### Changes to existing tables in v2.8:

Table Name	Changes
cescode cipcode indcodes inddir laytitle license moccode naiccode occodes occdir onetcode programs soccode stprogcd	The “title” field for each of these tables was expanded to varchar(200). In cases where there is a “short title” field, this was expanded to varchar(75).  Note that some tables have a “title” field (long title). In these cases the long title was set to varchar(200), and the “regular” title set to varchar(75).
programs	The field <i>etplapproval</i> was added to indicate ETPL approval of WIOA programs.
stfirms	The fields <i>siccode</i> , <i>naicscode</i> and <i>axnaicscode</i> were dropped, as QCEW hasn’t used these fields for years. The <i>indcode</i> field indicates the industry.
income incomtyp	The table income has two look-up tables, <i>incomtyp</i> and <i>incsource</i> . These lookup tables were linked by the key field <i>incsource</i> in the <i>incomtyp</i> table. This relationship was severed by removing the field <i>incsource</i> from table <i>incomtyp</i> , as income type and income source are unrelated attributes of income. <b>The foreign key references of income were modified to reflect this!</b>
inddir	The field <i>ownership</i> was added, taking its values from the ownership table.
demographics	All of the mean error fields (those ending with “me”) were removed from the table.
licauth	Three fields were added to allow better description of the licensing authority: <i>department</i> , <i>division</i> , and <i>board</i> .
license	Nine new attribute fields were added: <i>licensetype</i> , <i>exam</i> , <i>education</i> , <i>continuingedu</i> , <i>certification</i> , <i>experience</i> , <i>criminal</i> , <i>physical</i> , <i>veteran</i> , <i>inactive</i> . Also the field <i>licenseupdated</i> , to indicate the last time the license information was updated.

## Appendix D

### Workforce Information Database, Version 2.8 - Changes from Version 2.7

#### Tables added in v2.8:

Table Name	Description
licenseactivestatus licensecertification licensecontinuinged licensecriminal licenseeducation licenseexams licenseexperience licensephysicalreqs licensetypes licenseveteran	These are new lookup tables needed to support the revisions to the licensing tables.
mocxocc	New cross-walk table between military occupations and standard occupations, allowing for multiple standard occupation code systems to be stored in one table.

#### Other changes from v2.7 to v2.8

- The Introduction to the Data Dictionary has been revised for clarity. Changes include an explanation of the Field Values section of the Dictionary, and moving all contact information to a Contacts section. The ARC encourages DBAs to read the Introduction, especially new DBAs.
- Many tables have been deprecated, mostly because they are no longer needed. Remember that these tables are still part of the WID and are still supported for three versions after deprecation, at which point they will be dropped from the WID. See Appendix C for a complete list of tables deprecated in v2.8.
